DIRECTORS' REPORT

The Directors present the consolidated and separate financial statements of FSDH Merchant Bank Limited ("the Bank") and its subsidiaries (together, "the Group") for the year ended 31 December 2024.

(a) Legal form

First Securities Discount House Limited was incorporated on 23 June 1992 as a private limited liability company under the Companies and Allied Matters Act (CAMA). It started operations on 1 July 1992 and was granted a license to carry on discount house business on 10 February 1993. It was granted an approval to convert to a Merchant Bank on 22 November 2012 and officially changed its name to FSDH Merchant Bank Limited from First Securities Discount House Limited on 31 December 2012. The Bank commenced banking and financial services on 15 January 2013.

(b) Principal activity

The Bank's principal activity during the year was the provision of merchant banking services to its customers. The services principally involve transactional products and structuring of finance, money market activities including trading and holding of marketable securities such as treasury bills, government bonds, commercial bills and other eligible instruments.

The Bank has 100% controlling interest in FSDH Funding SPV Plc, a special-purpose entity incorporated in Nigeria. The SPV was set up to issue bonds to the public in order to provide funding to the Bank. The Bank issued Naira denominated unsecured senior debt and Naira denominated subordinated debt in February 2021 through FSDH Funding SPV Plc but there have been no additional issues of unsecured senior and subordinated debts since February 2021.

The Bank also has 100% controlling interest in FSDH Nominees Ltd, a special purpose vehicle (SPV) incorporated in Nigeria to provide premium Custodial Services such as asset safekeeping to Asset and Fund Managers, Banks, Insurance Companies, Foreign Portfolio Investors, High Net worth Individuals, and Private Equity firms.

The Bank is a subsidiary of FSDH Holding Company Limited, a non-operating legal entity domiciled in Nigeria, and regulated by the Central Bank of Nigeria as an "other financial institution".

(c) Operating results:

The following is a summary of the Group's operating results:

	Group		Bank	
	31 December 2024 (N'000)	31 December 2023 (N'000)	**31 December 2024 (N'000)**	31 December 2023 (N'000)
Profit before tax	**14,661,272**	5,303,206	**14,612,671**	5,276,491
Income tax expense	**(1,516,088)**	(619,255)	**(1,491,231)**	(619,255)
Profit after tax	**13,145,184**	4,683,951	**13,121,440**	4,657,236
Other comprehensive (loss)/income for the year, net of tax	**(875,636)**	2,928,012	**(875,636)**	2,928,012
Total Comprehensive Income for the year	**12,269,548**	7,611,963	**12,245,804**	7,585,248
Profit after tax attributable to equity holders of the holding company	**13,145,184**	4,683,951	**13,121,440**	4,657,236
Total comprehensive Income attributable to equity holders of the holding company	**12,269,548**	7,611,963	**12,245,804**	7,585,248

DIRECTORS' REPORT

(d) Final dividend

During the 2024 financial year, the Bank paid to its shareholders, dividend totalling ₦2.80bn (2023: ₦324m) for the full year ended 31 December 2023. The Board of Directors recommend, for the approval of the shareholders, the payment of a final dividend of ₦3.07billion representing ₦1.44k per share (December 2023: N0.67k) for the year ended December 31, 2024.

(e) Directors and their interests

The following directors of the Bank held office during the year ended December 31, 2024:

1.	Mr. Olufemi Agbaje	Chairman - Nigerian
2.	Mrs. Bukola Smith	Managing Director - Nigerian
3.	Ms. Stella-Marie Omogbai	Executive Director - Nigerian
4.	Mr Patrice Backer	Non-Executive Director - American
5.	Mr. Kelechi Okoro	Non-Executive Director - Nigerian
6.	Prof. Isabella Okagbue	Non-Executive Director - Nigerian
7.	Mr. Musa Ali Baba	Independent Director - Nigerian
8.	Mr. Godwin Ize-Iyamu	Independent Director – Nigerian
9.	Mr. Taiwo Otiti ****	Executive Director – Nigerian

**** Retired effective 8 September, 2024.

The proportion of women on the board of directors of FSDH Merchant Bank Limited as at December 31, 2024 was 37.50% (December 2023: 33.33%) broken down as below:

December 31, 2024	Female Directors	Total Directors	Percentage of female (%)
Executive directorship	2	2	100%
Non-executive directorship	1	6	16.67%
Total	**3**	**8**	**37.50%**

December 31, 2023	Female Directors	Total Directors	Percentage of female (%)
Executive directorship	2	3	66.67%
Non-executive directorship	1	6	16.67%
Total	**3**	**9**	**33.33%**

(f) Directors' interests in contracts

In accordance with Section 303 of the Companies and Allied Matters Act (CAMA), none of the directors has notified the Bank of any declarable interests in contracts with the Bank.

(g) Composition of top management

The Bank's top management is defined from the positions of Assistant General Manager (AGM) and above. As at 31 December 2024, the Bank had 14 staff members in this category (Dec 2023: 15).

The proportion of women in the Bank's top management positions as at 31 December 2024 was 36% (December 2023: 33.33%) broken down as below:

December 31, 2024	Female	Total	Percentage of Female
Assistant General Manager - General Manager	3	12	25%
Executive Director – Managing Director	2	2	100%
Total	**5**	**14**	**36%**

December 31, 2023	Female	Total	Percentage of Female
Assistant General Manager - General Manager	3	12	25.00%
Executive Director - Managing Director	2	3	66.67%
Total	**5**	**15**	**33.33%**

(h) Gender Balance ratio

According to the Bank's Diversity, Equality and Inclusion Policy, the applicable aspirational Gender Balance ratio for the Bank shall be 60:40 for men and women, respectively. The Bank will intentionally work towards achieving this ratio through the identification of prospective staff members for new roles and the replacement of outgoing staff.

(i) Board appointment process

The Governance, Nominations and Remuneration Committee shall manage the process for recommending nominees for appointment as directors of the Bank. All Board nominations shall be subject to the approval of the Board, the Central Bank of Nigeria and shareholders' ratification at the Annual General Meeting.

(j) Directors induction and training

Upon appointment, new directors of the Bank attend the formal induction programme of the Bank.
Directors also attend training programs in line with the directors' training plan.

(k) Shareholding analysis

The shareholding pattern of the Bank as at 31 December 2024 shows that the Bank is owned 99.99% by FSDH Holding Company Limited.

(l) Substantial interest in shares

According to the register of members as at 31 December 2024, the Bank is owned substantially by FSDH Holding Company Limited.

(m) Property and equipment

Information relating to changes in the property and equipment of the Bank is disclosed in Note 27 to the financial statements. In the directors' opinion, the market value of the Bank's property and equipment is not less than the value shown in the financial statements.

(n) Customer Complaints

It is the policy of the Bank to respond to customer complaints, disputes and issues swiftly and to take each complaint seriously. We diligently track complaint information for continuous improvement of our processes and services. An independent review of the root cause of complaints made is carried out and lessons learnt are fed back to the relevant business units to avoid future repetition. Customer complaint metrics are analysed and reports presented to Executive Management. Reports on customer complaints are also sent to the Central Bank as required.

In line with the Central Bank of Nigeria circular reference FPR/DIR/CIR/GEN/01/020, the activities of customer complaints management desk for the year is summarized below.

	NUMBER		COMPLAINTS RESOLVED WITHOUT REFUND		AMOUNT CLAIMED		AMOUNT REFUNDED	
FINANCIAL YEAR	**Dec-24**	**Dec-23**	**Dec-24**	**Dec-23**	**Dec-24**	**Dec-23**	**Dec-24**	**Dec-23**
Pending Complaints at the start of the year	8	2	-	-	203,385,332	-	-	-
Customer Complaints received	801	1,206	-	-	2,716,095,128	1,121,774,322	249,381,405	918,388,990
Customer Complaints resolved	783	1,200	-	-	249,381,405	918,388,990	249,381,405	918,388,990
Customer Complaints resolved without refund	23	-	2,400,954,627	-	-	-	-	-
Unresolved Complaints escalated to CBN for intervention	3	8	-	-	269,144,428	203,385,332	-	-
Unresolved Complaints pending with the Bank as at the end of the year	3	8	-	-	269,144,428	203,385,332	-	-

(o) Report/Statement on Frauds and Forgeries

For the year ended December 31, 2024, one case of attempted fraud was reported which resulted in no financial loss to the Bank. Accordingly, this was included in our February 2024 returns on Fraud and Forgeries to the Central Bank of Nigeria (CBN) during the year ended 31 December 2024 (December 2023:1 attempted case).

(p) Events after reporting date

There was no significant event after the reporting date that can materially affect the true and fair position of the consolidated and separate financial statements as at 31 December 2024.

(q) Human resources

Employee consultation and training

The Bank places considerable value on the involvement of its employees and has continued its previous practice of keeping them informed on matters affecting them as employees and the various factors affecting the performance of the Bank. This is achieved through regular and informal meetings between management and staff.

The Bank places a high premium on training and development of its manpower and sponsors employees for various training courses as appropriate.

Health, safety and welfare at work

The Bank maintains business premises designed with a view to guaranteeing the safety and healthy operating conditions of its employees and customers alike. Employees are adequately insured against occupational hazards. In addition, medical facilities are provided to employees and their immediate families at the Bank's expense.

Equal opportunity

The Bank's policy is that the highest qualified and most experienced persons are recruited for appropriate job levels irrespective of an applicant's gender, state of origin, ethnicity, religion or physical condition. As at December 31, 2024, the number of women in the employment of the Bank was 84 out of a total staff strength of 196, which represents 43% (December 2023: 69 out of a total staff strength of 175, which was 39.43%) of the workforce.

Employment of physically challenged persons

The Bank continues to maintain a policy of giving fair consideration to applications for employment made by physically challenged persons with due regard to their abilities and aptitude. The Bank's policy prohibits discrimination of physically challenged persons in the recruitment, training and career development of its employees. In the event of members of staff becoming physically challenged, efforts will be made to ensure that, as far as possible, their employment with the Bank continues and appropriate training is arranged to ensure that they fit into the Bank's working environment. Currently, the Bank has no person on its staff list with a physical disability (31 December 2023: Nil).

(r) Donations

In order to identify with the aspirations of the community and the environment within which the Bank operates, a total sum of ₦54,107,763 (31 December 2023: N33,489,878) was incurred in respect of donations during the year. Details of the donations and charitable contributions include:

20 March 2025

CORPORATE GOVERNANCE IN FSDH

Corporate governance in FSDH is based on the philosophy of building a structured organization, anchored on core values, with well-defined systems and processes that are adaptive to changes in the environment and resilient enough to cope with succession at all levels. This philosophy has been the guidepost in navigating the organization through its various phases of growth. It has ensured stability for the Bank, even as the economy as a whole and the financial services industry, in particular, went through various cycles of boom and bust.

At FSDH, corporate governance is not just about adopting national and international codes of best practices - it is rooted in shared values and a culture that aims to bring out the best in our staff members. This culture is well articulated in a "Culture Wheel" and well known to all members of staff. The culture wheel defines who the FSDH person is in terms of personal attributes and relationship with stakeholders, especially the customer. It is anchored on five pillars – High Performance, Customer Orientation, Learning, Collaboration, and Image Building. The interplay of these five pillars defines who we are and our way of doing business. It is reinforced by the Bank's Code of Conduct, the policies and procedures in place in the Bank, the examples set at the top by the Board and senior management, and the reward system.

The FSDH culture serves as a powerful tool in shaping the Bank's control and risk management environment and has continued to play an important role in improving the governance systems in the organization. It is the glue that binds all the stakeholders together and has resulted in the alignment of the external and the internal environment towards a common objective – that of meeting and exceeding the needs of our customers. Our unique ownership structure has combined with a responsive Board to produce a highly empowered management and staff, resulting in a governance structure that promotes accountability and transparency throughout the whole organization.

Over the years, we have taken deliberate steps towards improving our governance structures. We have put in place all the structures and processes stipulated in the CBN's Code of Corporate Governance. The position of the Managing Director/Chief Executive Officer of the Bank is separate from the position of the Chairman. Both positions are occupied by different people who are not related in any way. We have two independent directors and the number of Non-Executive Directors is more than the number of Executive Directors. We have also institutionalized the processes for the performance appraisal of directors (both executive and non-executive directors) and have revised the processes for setting goals for directors.

Directors and members of staff are regularly trained and we have continued to increase capacity in the key departments involved in the governance process. The Bank's Enterprise-wide Risk Management Framework (ERM) provides the platform for the management of risks in the organization. The ERM is regularly reviewed and updated in line with changing business and operational circumstances. In addition, the Bank has a code of conduct for directors and members of staff. The code of conduct specifies the Bank's expectations from its directors and members of staff.

Furthermore, the Bank has set up a robust whistle-blowing process as an added measure to ensure that the Board and members of staff of the Bank conform to the Bank's expectation in the performance of their duties. Whistle blowing provides a confidential channel for stakeholders to report wrong-doing, through hotlines and confidential email. The process is outsourced to an independent party - Deloitte Professional Services - a reputable professional services and advisory firm. Outsourcing the whistle-blowing process ensures that no member of staff in FSDH is in a position to access the whistle-blowing reports.

All reports are processed by Deloitte and a summary sent to FSDH for investigation. Details are contained in the Bank's website: www.fsdhgroup.com.

The Bank has adopted a framework for the management of environmental and social risks as stipulated in the sustainable banking guidelines of the CBN. The aim is to ensure that FSDH carries on its banking activities in a manner that will ensure the protection of our environment, enhance social harmony and ensure sustainable development. Our sustainable banking practices are based on the principles of meeting the needs of today without compromising the needs of future generations. Our policies and processes for on-boarding of clients (customers, vendors and suppliers) are very sensitive to environmental and social issues. The results of some of the measures we have taken in this regard are evident in the bio-friendly work environment that we maintain and the positive changes from our clients' environmental and social practices. We will continue to seek every opportunity to strengthen the processes to ensure that we contribute our own quota towards ensuring sustainable banking practices in Nigeria.

OWNERSHIP

FSDH Merchant Bank Limited is a subsidiary of FSDH Holding Company Limited.

THE BOARD

FSDH's Board is composed of experienced and knowledgeable professionals who have made their mark in key sectors of the economy. The Board is headed by a Chairman. The position of the Chairman of the Board is separate from the position of the Chief Executive Officer and therefore both positions are not occupied by the same person. At least once a year, an evaluation of the effectiveness of the Board is performed by an external consultant, in line with the requirements of the CBN's Code of Corporate Governance. An external consultant is engaged to conduct the Board performance appraisals. The Board has continued to receive good ratings on its effectiveness in the performance of its duties.

The Board has four standing committees – the Board Audit Committee, the Board Risk and Credit Committee, the Governance, Nominations and Remuneration Committee and the Board Finance and Strategy Committee. Together with the four committees, the Board provides effective oversight over the operations of the Bank. The duties of the Board are spelt out in the Board Charter. They include:

- Determination of the Bank's strategic direction and business objectives necessary to ensure long-term growth and sustained creation of value for customers.
- Ensuring the existence of plans and policies for the achievement of the Bank's strategic business objectives.
- The establishment of effective risk management framework to identify, measure, and manage risks in the Bank.
- The establishment of a good system of internal controls to ensure the integrity of financial reporting and compliance with laws and regulations.
- Fostering a culture of responsibility, transparency, and accountability through good corporate governance and adherence to high ethical values.
- Selection, compensation and monitoring of senior management staff and ensuring the existence of a good system of succession planning.
- Approval of major capital expenditure, changes to the Bank's capital structure, annual budgets, changes to accounting policies and dividend policy.

The Board Committees

The CBN's Corporate Governance Guidelines for Commercial, Merchant, Non-Interest and Payment Services Banks in Nigeria (2023) requires every Bank to have at least three Standing Committees namely: the Audit Committee, the Risk Management Committee, and the Governance, Nominations and Remunration Committee. FSDH has all the three Board Committees in compliance with the Code of Corporate Governance. In addition to the three Standing Committees, FSDH also has the Finance and Strategy Committee as a fourth Committee. Each Board Committee has a charter approved by the CBN.

The duties and responsibilities of the Board Committees are **summarized** below.

The Board Audit Committee

The Audit Committee is expected to have a minimum of 3 members and meets at least once every quarter. The Internal Audit Department, which is independent of management, reports directly to the Audit Committee. The Committee's duties include:

- Ensuring the establishment of effective systems and processes for the preparation of the Bank's financial statements.
- Ensuring the existence of good system of internal controls in the Bank.
- Ensuring the existence of a good internal audit function to monitor the activities of the Bank to ensure that the Bank's governance process is working properly, that risks are properly managed and that applicable laws are being complied with.
- Reviewing and monitoring the performance of external auditors and recommending to the Board on the appointment and discharge of external auditors.
- Ensuring that there is an effective system of monitoring compliance with laws and regulations and all licensing requirements and the results of management's investigation and follow-up (including disciplinary action) of any instance of non-compliance.

The Board Risk and Credit Committee

The Committee shall comprise a minimum of 6 members and its duties are:

- To approve and review the Enterprise Wide Risk Management Framework.
- The management of market risk in the Bank covering price risk, interest rate risk in the banking book and foreign exchange risk.
- The management of credit risk covering:
    - Credit risk strategy and policy formulation
    - Credit approval
    - Loan review and credit performance monitoring
    - Credit risk compliance
- Management of operational risk.
- Management of the Internal Capital Adequacy Process.
- Management of other risks which includes:
    - liquidity risk
    - reputational risk
    - regulatory compliance risk
    - concentration risk
    - downgrade risk
    - business risk

The Risk Management Department, which is independent of the operating departments, presents regular reports to the Risk Management Committee.

The Governance, Nominations and Remuneration Committee

The Governance, Nominations and Remuneration Committee shall comprise a minimum of 3 members. The Committee's duties include:

- Regularly review the structure, size and composition (including the skills, knowledge and experience) required of the Board compared with its present position and make recommendations to the Board on any changes the Committee may deem necessary.
- Give full consideration to succession planning for directors and top management in the course of its work, taking into account the challenges and opportunities facing the Bank, and what skills and expertise are needed on the Board in the future.
- Be responsible, subject to the Bank's Memart, for identifying and nominating for approval of the Board, candidates to fill Board vacancies as and when they arise.
- Make recommendations to the Board on matters relating to the continuation in office of any director at any time including the suspension or termination of service of an executive director as an employee of the Bank subject to the provisions of the law and their service contract.
- Make recommendations to the Chairman on the membership of other Board Committees, taking into consideration the skills, knowledge and experience required to function effectively in those Committees.
- Make recommendations to the Board for appointments and promotions of staff from the position of Assistant General Manager and above.
- Determine and agree with the Board the framework or broad policy for the remuneration of the Bank's Executive Directors and Chairman. (To avoid conflict of interest, the remuneration for non-executive Directors shall be determined by the Board and approved by the Shareholders).
- Determine and agree with the Board the policy for the terms of employment of the Executive Directors.
- Reviewing and approving the remuneration structure for the Bank.
- Review the ongoing appropriateness and relevance of the Bank's Remuneration policies.
- Review annually the remuneration trends across the Bank and the industry in which the Bank operates with a view to ensuring that the Bank remains competitive in order to retain and attract the right talents
- Determine and agree policy for the reimbursement of the expenses of the Chairman and the Executive Directors.
- Ensure that the disclosures in the audited accounts regarding directors' remuneration are adequate and consistent with the requirements of the law.
- Review and approve the design and structure of all retirement benefit schemes.

The Head of the HR Department presents reports at every sitting of the Committee.

The Board Finance and Strategy Committee

The Committee comprises a minimum of 3 members and its duties include:

- Understand, identify and discuss with management the key issues, assumptions, risks and opportunities relating to the development and implementation of the Bank's strategy.
- Ensure that a proper strategic planning process is implemented. This can be done by setting the parameters within which management develops the strategy – ensure that the strategy is aligned to the business objectives and prevailing operating environment, ensure that an annual strategy retreat is organized for the Board and management to provide input into management's assumptions and planning, etc.

CORPORATE GOVERNANCE REPORT

- Review the information made available by management, including business plans and financial, operational and personnel requirements to implement the agreed strategy.
- Critically evaluate and make recommendations to the Board for the approval of the Bank's business strategy.
- Oversee the Bank's Investment planning, execution and monitoring process.
- Oversee the long-term financing strategy and options for the Bank's projects.
- Review annually, the Bank's financial projections, as well as capital and operating budgets.
- Review on a quarterly basis with management, the progress of key initiatives, including actual financial results against targets and projections.
- Review and recommend for Board approval, the Bank's capital structure, including, but not limited to mergers, acquisitions, business expansions, allotment of new capital, debt limits and any changes to the existing capital structure.
- Oversee the process of capital raising and any listing of the Bank's shares.
- Review the Bank's strategy and financial objectives and monitor implementation of those strategies and objectives.
- Review and approve all operating expenses not in the approved budget that are above N10 million, but not exceeding N50 million. Operating expenses above N50 million, not in the approved budget, are to be recommended to the Board for approval.
- Review and approve capital expenditure above N10 million but not exceeding N50 million not included in approved budget.
- Review and make appropriate recommendations to the Board on any capital expenditure not included in the approved budget that is above N50 million.
- The Committee shall report all expenditure approvals by the Committee to the subsequent meeting of the Board.

REMUNERATION POLICY

Introduction:

The purpose of this section is to provide stakeholders with an understanding of the remuneration policy applied by the Bank for its employees and Directors (executive and non-executive).

The Bank's remuneration philosophy describes its approach to pay and pay peer group and a market anchor point within the Bank. It also indicates the extent of usage of variable pay or other strategic components for driving desired behaviour and strategic objectives.

The Bank recognises that its employees and Directors are key to executing its business strategy. In line with this realisation, the Bank is committed to developing and continuously refining its Value Proposition for its employees and Directors with a view to optimising business results and ensuring sustainability. Given the important role of remuneration in driving performance, the Bank has put in place a Remuneration Policy that defines the underlying principles and framework for setting and managing remuneration in a way that aligns with business objectives. The Policy follows leading practices, leveraging key principles from the corporate governance code issued by the Central Bank of Nigeria (CBN) and defines a framework for managing remuneration at the Bank.

The Governance, Nominations and Remuneration Committee ("GNRC") of the Bank, on behalf of the Board of Directors ("the Board"), is responsible for putting in place and reviewing the Policy. This is in line with the Committee's primary responsibility of advising the Board on remuneration and all other human resource matters affecting Directors and employees of the Bank.

Directors (Executive and Non-Executive)

The Director's Remuneration Policy defines a framework for managing Directors' remuneration at the Bank, which covers the following categories:

I. Executive Directors (EDs): Managing Director (MD) and Executive Directors (Executives)

II. Non-Executive Directors (NEDs): Chairman and Other Non-Executive Directors.

The Policy sets forth the Bank's remuneration philosophy, remuneration structure, the various pay components, the rules for administering each remuneration component, remuneration review process, disclosure, reporting requirements and persons responsible as custodians of the Policy.

The objectives of the Policy are as follows:

1. To provide remuneration capable of attracting, retaining, and rewarding well qualified Directors.

2. To ensure that Directors are adequately rewarded and motivated by a remuneration strategy that adequately reflects individual efforts and contributions to the success of the Bank.

3. Align Directors' remuneration with the Bank's performance, Shareholders' interests, and a prudent approach to risk management.

4. Provide a fair, equitable and transparent framework for setting and managing Directors' remuneration at the Bank.

5. Promote compliance with global regulatory trends and governance requirements, with emphasis on long-term sustainability.

6. Incentivise Directors to deliver sustained performance consistent with strategic goals and appropriate risk management, and to reward success based on the value created.

Executive management and employees

The goal of the policy is to attract the best hands, meet the needs of all current employees and encourage well performing employees to stay with the Bank, while optimizing the wage bill of the Bank. With this, the compensation structure is built to balance both the needs of the employees and the Bank. It is the goal of the Bank to pay members of staff salaries that are competitive with other players in the industry segment in a way that will be motivational, fair and equitable. Total compensation may, however, vary depending upon the performance of the individual staff and their contribution to the global performance of the Bank. In setting the compensation of members of staff in the Bank, the HR Unit, with the approval of the GNRC of the Board will employ industry best practices and existing compensation surveys in determining the appropriate compensation for all members of staff.

MANAGEMENT

The management is charged with the day-to-day running of the Bank. It is headed by the Managing Director, who is also the Chief Executive Officer (CEO). During the year, she was supported by two Executive Directors (one of whom retired from his position before year end) and heads of departments. In addition, the Bank makes use of standing committees in the performance of certain key functions whose processes cut across different departments. The standing committees are:

The Executive Committee

The Executive Committee is made up of the Managing Director, the Executive Directors and the heads of departments. This is the principal decision-making organ of Management and the committee meets on a monthly basis.

The Asset and Liability Management Committee (ALCO)

The ALCO meets monthly and is composed of heads of departments and key officers of the Business Units, Financial Control and Risk Management. The Committee makes decision on the structure and composition of the Bank's assets and liabilities and also sets the guidelines on interest rates.

The Management Risk Committee

The Management Risk Committee is responsible for identifying, quantifying and managing the risks inherent in the Bank's operations. The membership of the Committee is constituted by heads of departments and key officers in the business units. The Committee is also responsible for approving new credits and reviewing existing credits for performance and classification.

The IT Steering Committee

The IT Steering Committee is responsible for making recommendations to Executive Management on the formulation of IT strategies and the identification of systems needed to support the Bank's business. It is also in charge of implementing these systems. The Committee is constituted by the CEO and Heads of Departments.

The Sustainable Banking Committee

The Committee is charged with the responsibility of ensuring that the Bank conducts its operations in a way that will ensure protection for the environment, enhance social harmony and ensure sustainable development. The Committee ensures that social and environmental risks in all areas of the Bank's operations are identified and dimensioned; and develops policies and controls to ensure that the risks are properly managed

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RELATION TO THE ANNUAL REPORT FOR THE YEAR ENDED 31 DECEMBER 2024.

The directors accept responsibility for the preparation of the consolidated and separate financial statements that give a true and fair view in accordance with IFRS Accounting Standards, as issued by the International Accounting Standards Board (IFRS Accounting Standards) and in the manner required by the Companies and Allied Matters Act (CAMA), 2020, Financial Reporting Council of Nigeria (Amendment) Act, 2023, the Bank and other Financial Institution Act (BOFIA) 2020, and relevant Central Bank of Nigeria guidelines and circulars.

The directors further accept responsibility for maintaining adequate accounting records as required by the Companies and Allied Matters Act (CAMA), 2020 and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

The directors have made an assessment of the Group and Bank's ability to continue as a going concern and have no reason to believe the Bank will not remain a going concern in the year ahead.

REPORT OF THE BOARD AUDIT COMMITTEE

In accordance with the provisions of Section 404 (7) of the Companies and Allied Matters Act (CAMA), the members of the Audit Committee of FSDH Merchant Bank Limited hereby report as follows:

- We have exercised our statutory functions under Section 404 (7) of the Companies and Allied Matters Act (CAMA) and acknowledge the co-operation of management and staff in the conduct of these responsibilities.

- We are of the opinion that the accounting and reporting policies of the Bank is in accordance with legal requirements and agreed ethical practices and that the scope and planning of both the external and internal audits for the year ended 31 December 2024 were satisfactory and reinforce the Bank's internal control systems.

- As required by the provisions of the Central Bank of Nigeria circular BSD/1/2004 dated February 18, 2004 on "Disclosure of Insider-Related Credits in Financial Statements" we reviewed the insider - related credits of the Group and Bank and found them to be as disclosed in Note 45 of the consolidated and separate financial statements.

- We have deliberated with the external auditors, who have confirmed that necessary cooperation was received from management in the course of their statutory audit and we are satisfied with management's responses thereon and with the effectiveness of the Bank's system of accounting and internal control.

Musa Ali Baba
Chairman, Audit Committee

STATEMENT OF CORPORATE RESPONSIBILITY FOR THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2024.

Further to the provisions of section 405 of the Companies and Allied Matters Act (CAMA), 2020, we, the Managing Director/Chief Executive Officer and Chief financial Officer, hereby certify the financial statements of FSDH Merchant Bank Limited for the year ended 31 December 2024 as follows:-

i. That we have reviewed the audited consolidated and separate financial statements of the Bank for the year ended 31 December 2024.
ii. That the audited consolidated and separate financial statements do not contain any untrue statement of material fact or omit to state a material fact which would make the statements misleading, in the light of the circumstances under which such statement was made.
iii. That the audited consolidated and separate financial statements and all other financial information included in the statements fairly present, in all material respects, the financial condition and results of operation of the Bank as of and for, the year ended 31 December 2024.
iv. That we are responsible for establishing and maintaining internal controls and have designed such internal controls to ensure that material information relating to the Bank is made known to us by other officers of the companies, for the year ended 31 December 2024.
v. That there were no significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our evaluation, including any corrective action with regard to significant deficiencies and material weaknesses.
vi. That we have disclosed the following information to the Bank’s Auditors and Audit Committee:

   a. There are no significant deficiencies in the design or operation of internal controls which could adversely affect the Bank’s ability to record, process, summarise and report financial data, and have identified for the Bank’s auditors any material weaknesses in internal controls, and
   b. there is no fraud that involves management or other employees who have a significant role in the Bank’s internal control.

Management's Assessment of and Report on Internal Control Over Financial Reporting for the year ended 31 December 2024

The Management of FSDH Merchant Bank ("the Bank"), and its subsidiaries, FSDH Nominees Ltd and FSDH Funding SPV Plc, (together "the Group") is responsible for establishing and maintaining adequate internal control over financial reporting as required by the Financial Reporting Council of Nigeria (Amendment Act, 2023).

The management of FSDH Merchant Bank Ltd assessed the effectiveness of our internal control over financial reporting as of 31 December 2024 using the criteria set forth in Internal Control - 2013 Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("the COSO Framework") and in accordance with the Financial Reporting Council of Nigeria Guidance on Management Report on Internal Control Over Financial Reporting.

As of December 31, 2024, the management of FSDH Merchant Bank Ltd did not identify any material weakness in its assessment of internal control over financial reporting and as a result, management has concluded that, as of December 31, 2024, the Group's internal control over financial reporting was effective.

The Group's independent auditor, KPMG Professional Services, who audited the consolidated and separate financial statements included in this annual Report, has issued an unmodified conclusion on the effectiveness of the Company's internal control over financial reporting as of 31 December 2024 based on the limited assurance engagement performed by them. KPMG Professional Services' limited assurance report will be filed as part of the FSDH Merchant Bank's annual report.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred subsequent to the date of our evaluation of the effectiveness of internal control over financial reporting that significantly affected, or are reasonably likely to significantly affect, the Bank's internal control over financial reporting.

Certification of Assessment of and Report on the Effectiveness of Internal Control Over Financial Reporting as of 31 December 2024

To comply with the provisions of Section 1.3 and Appendix 1 of the Financial Reporting Council of Nigeria Guidance on Management Report on Internal Control over Financial Reporting, i hereby make the following statements regarding the Internal Controls of FSDH Merchant Bank ("the Bank"), and its subsidiaries, FSDH Nominees Ltd and FSDH Funding SPV Plc, (together "the Group") as of 31 December 2024:

I, Bukola Smith, the Chief Executive Officer, certify that:

- I have reviewed this management assessment and report on the effectiveness of Internal Control over Financial Reporting;
- Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the entity as of, and for, the periods presented in this report;
- The group's other certifying officer and I:
    a) are responsible for establishing and maintaining internal controls;
    b) have designed such internal controls and procedures to ensure that material information relating to the Bank, and its consolidated subsidiaries, is made known to us by others within the entity, particularly during the period in which this report is being prepared;
    c) have designed such internal control system to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS Accounting Standards;
    d) have evaluated the effectiveness of the group's internal controls and procedures as of a date within 90 days prior to the report and presented in this report our conclusions about the effectiveness of the internal controls and procedures, as of the end of the period covered by this report based on such evaluation.
- The group's other certifying officer and I have disclosed, based on our most recent evaluation of internal control system, to the group's auditors and the audit committee that:
    a) there are no significant deficiencies or material weaknesses in the design or operation of the internal control system which are reasonably likely to adversely affect the group's ability to record, process, summarize and report financial information; and
    b) there is no fraud, whether or not material, that involves management or other employees who have a significant role in the group's internal control system.
- The group's other certifying officer and I have identified in the report whether or not there were significant changes in internal controls or other facts that could significantly affect internal controls subsequent to the date of our evaluation.

Independent Auditor's Limited Assurance Report

To the Shareholders of FSDH Merchant Bank Limited

Report on Limited Assurance Engagement Performed on Management's Assessment of Internal Control Over Financial Reporting

Conclusion

We have performed a limited assurance engagement on whether internal control over financial reporting of FSDH Merchant Bank Limited ("the Bank") and its subsidiaries (together "the Group") as of 31 December 2024 is effective in accordance with the criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("the COSO Framework") and the Financial Reporting Council of Nigeria Guidance on Management Report on Internal Control Over Financial Reporting.

Based on the procedures performed and evidence obtained, nothing has come to our attention to cause us to believe that the Group's internal control over financial reporting as of 31 December 2024 is not effective, in all material respects, in accordance with the criteria established in the COSO Framework and the Financial Reporting Council of Nigeria Guidance on Management Report on Internal Control Over Financial Reporting.

Basis for conclusion

We conducted our engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised), *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information* issued by the International Auditing and Assurance Standards Board (IAASB) and the Financial Reporting Council of Nigeria Guidance on Assurance Engagement Report on Internal Control over Financial Reporting. Our responsibilities are further described in the "Our responsibilities" section of our report.

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants *(including International Independence Standards)* issued by the International Ethics Standards Board for Accountants (IESBA).

Our firm applies International Standard on Quality Management (ISQM) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, issued by the IAASB. This standard requires the firm to design, implement and operate a system of quality management, including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Other matter

We have audited the consolidated and separate financial statements of FSDH Merchant Bank Limited in accordance with the International Standards on Auditing, and our report dated 02 May 2025, expressed an unmodified opinion of those consolidated and separate financial statements.

Our conclusion is not modified in respect of this matter.

Responsibilities for Internal Control over Financial reporting

The Board of Directors of FSDH Merchant Bank Limited is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report on the Effectiveness of Internal Control over Financial Reporting as of 31 December 2024. Our responsibility is to express a conclusion on the Group's internal control over financial reporting based on our assurance engagement.

Our responsibilities

The Financial Reporting Council of Nigeria Guidance on Assurance Engagement Report on Internal Control over Financial Reporting ("the Guidance") requires that we plan and perform the assurance engagement and provide a limited assurance report on the Group's internal control over financial reporting based on our assurance engagement.

Summary of the work we performed as the basis for our conclusion

We exercised professional judgment and maintained professional skepticism throughout the engagement. As prescribed in the Guidance, the procedures we performed included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our engagement also included performing such other procedures as we considered necessary in the circumstances. We believe the procedures performed provide a basis for our report on the internal control put in place by management over financial reporting.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Definition and Limitations of Internal Control Over Financial reporting

The company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The company's internal control over financial reporting includes those policies and procedures that:

(i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

(ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

(iii) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Furthermore, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Lagos State, Nigeria.

Dear Sir,

Report of the Independent Consultants on the Review of the Corporate Governance Framework and Performance of the Board of Directors of FSDH Merchant Bank Limited

Deloitte & Touche has performed the annual review of the corporate governance framework and evaluation of the performance of the Board of Directors of FSDH Merchant Bank Limited ("FSDH Merchant Bank") for the year ended 31 December 2024. The scope of the review included an assessment of the structure, mandate and performance of the Board, Board Committees and Management as it relates to the overall strategic direction of the company, stakeholder engagement, disclosures, and transparency.

The review was performed in compliance with the Corporate Governance Guidelines for Commercial, Merchant, Non-Interest and Payment Service Banks issued by the Central Bank of Nigeria ("CBN CG Guidelines") and the Nigerian Code of Corporate Governance ("NCCG"). The scope of the review included an assessment of key areas of FSDH Merchant Bank's corporate governance framework, including the framework of the Board structure and composition, Board operations and effectiveness, assurance functions, corporate disclosures, and relationship with stakeholders. The report of our evaluation was premised on desk review of relevant governance documents, policies, and procedures, interview sessions with Directors and select members of executive management and survey responses received from the Directors.

The result of our evaluation has shown that the Board and Corporate Governance framework and practices in FSDH Merchant Bank comply with the provisions of the extant Codes of Corporate Governance. We also ascertained that the key Board functionaries (Board and Board Committee Chairpersons) and the Board Committees met their responsibilities under the Codes and governance charters in FSDH Merchant Bank. The report further highlights details of our review activities, observations and some recommendations for the Board and Executive Management's action for sustained improvement to the performance of the Board, Corporate Governance and Secretarial functions of FSDH Merchant Bank.

It should be noted that the matters raised in this report are only those that came to our attention during the course of our review. The evaluation is limited in nature and does not necessarily disclose all significant matters about the company or reveal any irregularities. As such, we do not express any opinion on the activities reported. The report should be read in conjunction with the Corporate Governance Section of the Annual Report.

Yours faithfully,
For: Deloitte and Touche

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of FSDH Merchant Bank Limited

Report on the Audit of the Consolidated and Separate Financial Statements

Opinion

We have audited the consolidated and separate financial statements of FSDH Merchant Bank Limited ("the Bank") and its subsidiaries (together, "the Group"), which comprise:

- the consolidated and separate statements of financial position as at 31 December 2024;
- the consolidated and separate statements of comprehensive income;
- the consolidated and separate statements of changes in equity;
- the consolidated and separate statements of cash flows for the year then ended; and
- the notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated and separate financial statements give a true and fair view of the consolidated and separate financial position of the Bank and its subsidiaries as at 31 December 2024, and of its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards) and in the manner required by the Companies and Allied Matters Act (CAMA), 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023, the Banks and Other Financial Institutions Act, 2020 and relevant Central Bank of Nigeria (CBN) Guidelines and Circulars.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the consolidated and separate Financial Statements section of our report. We are independent of the Group and Bank in accordance with International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated and separate financial statements in Nigeria and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Impairment allowance for loans and advances to customers

The Bank's determination of impairment losses on loans and advances to customers is inherently a significant area for the Bank as significant judgments and assumptions are made by the Bank over the estimation of the size of the impairment allowance.

The Bank uses an Expected Credit Loss (ECL) model to determine the size of the impairment allowance for loans and advances. The ECL methodology incorporates the expected future credit losses due to macroeconomic variables.

The Bank's ECL model includes certain judgements and assumptions such as:

- the determination of the probability of a loan becoming past due and subsequently defaulting;
- the determination of the Bank's definition of default;
- the criteria for assessing significant increase in credit risk (SICR);
- the credit conversion factors applied in the ECL model;
- the rate of recovery on the loans that are past due and in default;
- the identification of impaired assets and the estimation of impairment, including the estimation of future cash flows, market values and estimated time and cost to sell collaterals; the incorporation of forward-looking information related to the expected outlook on the country's inflation rates, exchange rates and the Gross Domestic Product (GDP) rates used in determining the expected credit losses in the loans and advances portfolios.

We focused on the impairment allowance for loans and advances to customers due to the significant judgements, estimates and assumptions made by the Bank in determining the impairment allowance required.

How the matter was addressed in our audit

Our procedures included the following:

- we evaluated the design and implementation and tested the operating effectiveness of the controls relating to the Bank's review of credit risk gradings for the Bank's corporate loans and advances and the Bank's monitoring and identification of loans displaying indicators of impairment.
- we assessed the Bank's definition of default for consistency with the requirements of the relevant accounting standard.
- we assessed the appropriateness of the Bank's determination of significant increase in credit risk (SICR) and the resultant classification of loans into various stages of credit risk for reasonableness.
- with the assistance of our Financial Risk Management specialists, we:

  - assessed the appropriateness of the Bank's ECL methodology by considering whether it reflects probability-weighted amounts that are determined by evaluating a range of possible outcomes, the time value of money and reasonable and supportable information at the reporting date about past events, current conditions and forecasts of future economic conditions;
  - tested the accuracy and appropriateness of the data used in determining the Exposure at Default, including the credit conversion factor and outstanding loan balance;
  - assessed the reasonableness of the Loss Given Default (LGD) used by the Bank in the ECL model and other evidence of future cash flows by evaluating the valuation reports and assessing haircuts applied by the Bank on the recoverability of collateral considering the current economic conditions;
  - challenged the appropriateness of the Bank's forward-looking assumptions comprising the inflation rates, exchange rates and GDP growth rates used in the ECL calculations using publicly available information from external sources;
  - tested the accuracy of the Bank's impairment model by independently re-performing the calculations of impairment allowance for loans and advances.
- we evaluated the adequacy and appropriateness of the disclosures made on impairment allowance for loans and advances to customers in the consolidated and separate financial statements.

The Bank's disclosure on critical judgements and estimates and impairment allowance for loans and advances are shown in Notes 4.6 and 8 respectively in the consolidated and separate financial statements for the year ended 31 December 2024.

Valuation of Trading assets and liabilities

The trading assets of the Group relate to securities obtained by the Bank under a repurchase agreement while the trading liabilities relate to securities pledged out under a repurchase agreement.

Based on the business model of the Bank these securities were classified as Fair Value Through Profit or Loss (FVTPL). These securities are unquoted securities and are valued using observable inputs of similar quoted securities on FMDQ Group Plc daily quotation platform. The Bank's valuation model uses various judgements and assumptions, including the estimation of the market prices and present value of future cashflows.

The valuation of the trading assets and liabilities has been considered as a key audit matter due to the complexity around the judgements and assumptions made by the Bank in determining the fair value of the securities.

How the matter was addressed in our audit

Our procedures included the following:

- we assessed the appropriateness of the accounting policies applied by the Group against the requirement of the relevant accounting standards.
- we obtained relevant agreements and other supporting documents to confirm existence of the transactions.
- we recomputed the interest income and expense on each transaction based on the parameters provided in the agreement.
- we compared the schedule of trading assets to the CBN S4 securities report as at 31 December 2024.
- for unquoted trading assets and liabilities we obtained the market prices of two similar securities from FMDQ Group Plc daily quotation platform, and we interpolated the market prices to determine the appropriate market price for the valuation.
- we recomputed the present value of future cashflows based on parameters provided in the agreement.
- we evaluated the adequacy and appropriateness of the disclosures made on trading assets and liabilities in the consolidated and separate financial statements.

The Bank's disclosure on critical judgments and estimates and trading assets are shown in Notes 4.6 and 17 respectively in the consolidated and separate financial statements for the Year ended 31 December 2024.

Other Information

The Directors are responsible for the other information. The other information comprises the Corporate Information, Directors' report, Corporate Governance Report, Statement of Directors' Responsibilities, Report of the Board Audit Committee, Statement of Corporate Responsibility, Certification Pursuant to Section 1.3 of the Financial Reporting Council of Nigeria Guidance on Management Report on Internal Control over Finacnail Reporting, Report on the Effectiveness of Internal Control over Financial Reporting as of 31 December 2024, Management Report of the Independent Consultants on the Review of the Corporate Governance Framework and Performance of the Board of Directors and Other National disclosures, but does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Consolidated and Separate Financial Statements
The Directors are responsible for the preparation of consolidated and separate financial statements that give a true and fair view in accordance with IFRS Accounting Standards and in the manner required by the Companies and Allied Matters Act (CAMA), 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023, the Banks and Other Financial Institutions Act, 2020 and relevant Central Bank of Nigeria (CBN) Guidelines and Circulars and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group and Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and Bank or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements
Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group and Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group and Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the Group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the Board Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

From the matters communicated with the Board Audit Committee, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Compliance with the requirements of Schedule 5 of the Companies and Allied Matters Act (CAMA), 2020.

i. We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.
ii. In our opinion, proper books of account have been kept by the Bank, so far as appears from our examination of those books.
iii. The Bank's consolidated and separate statement of financial position and consolidated and separate statement of comprehensive income are in agreement with the books of account.

Compliance with Section 26 (3) of the Banks and Other Financial Institutions Act, 2020 and Central Bank of Nigeria circular BSD/1/2004

i. The Bank and Group paid a penalty of ₦22million in respect of contravention noted from the CBN Risk Based Supervisory review as disclosed in note 48 to the consolidated and separate financial statements.
ii. Related party transactions and balances are disclosed in Note 43 to the consolidated and separate financial statements in compliance with the Central Bank of Nigeria circular BSD/1/2004.

Compliance with FRC Guidance on Assurance Engagement Report on Internal Control over Financial Reporting

In accordance with the requirements of the Financial Reporting Council of Nigeria, we performed a limited assurance engagement and reported on management's assessment of the Group's internal control over financial reporting as of December 31, 2024. The work performed was done in accordance with ISAE 3000 (Revised) *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information* and the FRC Guidance on Assurance Engagement Report on Internal Control over Financial Reporting. We have issued an unmodified conclusion in our report dated 02 May 2025. That report is included on page 27 of the annual report.

The accompanying notes are an integral part of these consolidated and separate financial statements

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2024

1. General information

FSDH Merchant Bank Limited ("the Bank") was incorporated on 23 June 1992 as a private limited liability company under the Companies and Allied Matters Act (1990). It started operations on 1 July 1992 and was granted license to carry on discount house business on 10 February 1993. The Bank commenced operations as a Merchant Bank on 15 January 2013.

These financial statements are the consolidated and separate financial statements of the Bank.

The consolidated and separate financial statements of the bank for the year ended 31 December 2024 were approved for issue by the Board of Directors on March 20, 2025.

2. Basis of preparation

The consolidated and separate financial statements of the FSDH Merchant Bank Limited ("the Bank"), FSDH Nominees Limited ("the Nominee"), and FSDH Funding SPV Plc. (herein collectively referred to "the Group") for the year ended 31st December 2024 have been prepared in accordance with IFRS Accounting Standards, the requirements of the Companies and Allied Matters Act (CAMA) 2020, Banks and Other Financial Institutions Act (BOFIA) 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023. Additional information required by national regulations is included where appropriate. The financial statements have been prepared in accordance with the going concern principle. The Group presents its statement of financial position in order of liquidity and analysis regarding recovery or settlement within 12 months after reporting date (current) and more than 12 months (non-current) is presented in the respective related notes in the financial statements.

a. Functional and presentation currency

These financial statements are presented in Nigerian Naira, which is the Bank's functional currency. Except where indicated, financial information presented in Naira has been rounded to the nearest thousand.

b. Basis of measurement

These financial statements have been prepared on the historical cost basis except for the following:

- Financial assets measured at fair value through other comprehensive income (FVOCI).
- Financial assets held for trading are measured at fair value through profit or loss (FVPL).
- Loans and receivables are measured at amortised cost.
- Derivative financial instruments which are measured at fair value through profit or loss.

c. Use of judgement and estimates

The preparation of the financial statements in conformity with IFRS Accounting Standards requires the directors to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

Significant estimates and judgements are in relation to the following as they affect the 2024 financial statements:

- Impairment of financial instruments: key assumptions used in estimating recoverable cash flows.
- recognition of deferred tax assets: availability of future taxable profit against which carry-forward tax losses can be used.
- determination of the fair value of financial instruments with unobservable inputs.

More details are provided in note 3.6.

2.1 Changes in material accounting policies

2.11 Standards and interpretations effective during the reporting period

The Group and Bank does not have changes in material accounting policies in the current annual reporting period.

2.12 Standards and interpretations issued/amended but not yet effective.

Certain accounting standards and interpretations have been issued or amended by the IASB but are yet to become effective for annual periods beginning on 1 January 2024 and have not been earlier adopted by the bank.

Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7 Financial Instruments: Disclosures– Effective date of 1st January 2026

The International Accounting Standards Board (IASB) issued amendments to the classification and measurement requirements in IFRS 9 Financial Instruments. The key amendments include the:

• Settlement of financial liabilities through electronic payment systems: The amendment clarify that a financial liability is derecognised in the "settlement date". However, the amendments provide an exception for the derecognition of financial liabilities. This exception allows the company to derecognise its trade payables before ethe settlement date when it uses an electronic payment system, provided that the specified criteria are met.

• Additional SPPI Test for Contingent Features: The amendments introduce an additional SPPI test for financial assets with contingent features that are not directly related to a change in basic lending risks or costs – for example, where the cash flows change depending on whether the borrower meets an ESG target specified in the loan contract. Under the amendments, certain financial assets, including those with ESG-linked features, could now meet the SPPI criterion, provided that their cash flows are not significantly different from an identical financial asset without such a feature.

• Clarification on Contractually Linked Instruments (CLIs): The amendments clarify the key characteristics of CLIs and how they differ from financial assets with non-recourse features. They also include factors that a company needs to consider when assessing the cash flows underlying a financial asset with non-recourse features ("the look through" test).

• Additional Disclosure Requirements: The amendments require additional disclosures for investments in equity instruments designated at fair value through other comprehensive income and financial instruments with contingent features that are directly related to a change in basic lending risks or costs and are not measured at fair value through profit or loss.

The Group is yet to carry-out an assessment to determine the impact that the amendments could have on its business; however, the Group will adopt the standard for the year ending 31 December 2026.

IFRS 18 Presentation and Disclosure in Financial Statements – Effective date of 1st January 2027

The new standard introduces the following key new requirements:

- It promotes a new structured income statement it introduces a newly defined “operating profit” subtotal and a requirement for all income and expenses to be classified into three new distinct categories, operating, investing, and financing, based on a company’s main business activities.
- All companies are required to report the newly defined “operating profit” subtotal – an important measure for investors’ understanding of a company’s operating results – i.e. investing and financing results are specifically excluded. This means that the results of equity-accounted investees are no longer part of the operating profit and are presented in the “investing” category.
- Management-defined performance measures (MPMs) are disclosed in a single note in the financial statements.
- Enhanced guidance is provided on how to group information in the financial statements. This includes guidance on whether information is included in the primary financial statements or is further disaggregated in the notes. Companies are discouraged from labelling items as “other” and will now be required to disclose more information if they continue to do so.
- Entities are required to use the operating profit subtotal as the starting point for the statement of cashflows when presenting operating cash flows under the indirect method.
- It also required Companies to analyse their operating expense directly on the face of the income statement – either by nature, by function or using a mixed presentation. If any items are presented by function on the face of the income statement (e.g. cost of sales), then a company provides more details disclosures about their nature.

The Group is yet to carry-out an assessment to determine the impact that the amendments could have on its business; however, the Group will adopt the standard for the year ending 31 December 2027.

3 Material accounting policies

The principal accounting policies applied in the preparation of these consolidated and separate financial statements are set out below. These policies have been consistently applied to all periods presented unless otherwise stated.

a) Basis of consolidation

The financial statements of the consolidated subsidiaries used to prepare the consolidated financial statements were prepared as of the parent company’s reporting date.

(i) Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and can affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the Group. Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. The accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated income statement, statement of comprehensive income, statement of changes in equity and statement of financial position respectively.

(ii) Structured entities (also called Special Purpose Entities): Structured entities are entities that have been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity such as when any voting right relates to administrative tasks only and the relevant activities are directed by means of contractual agreements.

The Group assesses structured entities that it is involved in for control and if it is exposed or has right to variable returns from its involvement with the entity and has ability to affect these returns through its power over the entity.

(iii) Transactions and non-controlling interests

The Group applies a policy of treating transactions with non-controlling interests as transactions with equity owners of the Group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

Interests in the equity of subsidiaries not attributable to the parent are reported in consolidated equity as non-controlling interest. Profits or losses attributable to non-controlling interests are reported in the consolidated statement of comprehensive income as profit or loss attributable to non-controlling interests.

(iv) Changes in ownership interests in subsidiaries without change of control.

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in equity attributable to owners of the Group.

(v) Disposal of subsidiaries

When the Group ceases to have control, any retained interest in the entity is re-measured to its fair value at the date when control is lost, with the change in the carrying amount recognised in the statement of comprehensive income. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to the income statement.

b) Revenue recognition

The Group recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the Group's activities as described below. The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement. It is also the Group's policy to recognise revenue from a contract when it has been approved by both parties, rights have been clearly identified, payment terms have been defined, the contract has commercial substance, and collectability has been ascertained as probable. Revenue is recognised when control of goods or services have been transferred. Control of an asset refers to the ability to direct the use of and obtain substantially all of the remaining benefits (potential cash inflows or savings in cash outflows) associated with the asset.
The following are the income lines of the Group and how income is recognised:

- Credit related fees: This includes fees charged for servicing loans, issuance fees on guarantees, commitment fee when it is unlikely that a specific lending arrangement will be entered into. These fees are not integral to the loan, therefore, they are not considered in determining the effective interest rate. The fees noted here are based on negotiation. The fees are either earned at point in time or over time dependent on the terms of the contract.
- Commission on trade related transactions: These are commission earned on trade-related transactions. The rates are agreed ahead, and income is based on the value of the transactions and thus are satisfied at a point in time.
- Financial advisory and issuing house activities fees: These are agreed upfront and based on financial advisory services rendered to clients. These include capital market service-related fees, brokerage and advisory fees. The fees are either earned at point in time or over time dependent on the terms of the contract.
- Account maintenance fees and funds transfer fees and charges: Account maintenance fees are recurring charges on customers' accounts for keeping the accounts operational with the Bank. Funds transfer fees and charges are charges from customers' usage of the Bank's electronic and funds transfer platforms.
- Other commissions: This includes electronic grouping charges, account transaction fee, custody fees among others. The fees are earned at a point in time.

c) Sale and repurchase agreements.

Securities sold under agreements to repurchase at a specified future date are not derecognised from the statement of financial position as the Group retains substantially all of the risks and rewards of ownership. The counterparty liability received is recognised in the statement of financial position as a liability and classified as trading liabilities, including accrued interest. The financial assets are used as collateral on securities lent and repurchase agreement, reflecting the transaction's economic substance as a loan to the Group. The difference between the sale and repurchase prices is treated as interest expense and is accrued over the life of the agreement using the effective interest rate. When the counterparty has the right to sell or re-pledge the securities, the Group reclassifies those securities in its statement of financial position to 'pledged assets" as appropriate.

Securities purchased under agreements to resell (reverse repos) are recorded as due from Group and measured at amortised cost. The securities pledged under such agreements are not included in the statement of financial position. Securities repossessed under a reverse repo transaction are recognised in the books of the Group. The instruments are classified in the financial statements according to their nature and purpose.

d) Financial assets and financial liabilities

Measurement methods

Amortised cost and effective interest rate

The amortised cost is the amount at which the financial asset or financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e. its amortised cost before any impairment allowance) or to the amortised cost of a financial liability. The calculation does not consider expected credit losses and includes transaction costs, premiums or discounts and fees and points paid or received that are integral to the effective interest rate, such as origination fees.

When the Group revises the estimates of future cash flows, the carrying amount of the respective financial assets or financial liability is adjusted to reflect the new estimate discounted using the original effective interest rate. Any changes are recognised in profit or loss.

Interest Income

Interest income is calculated by applying the effective interest rate to the gross carrying amount of financial assets, except for:

(a) POCI financial assets, for which the original credit-adjusted effective interest rate is applied to the amortised cost of the financial asset.

(b) Financial assets that are not 'POCI' but have subsequently become credit-impaired (or 'stage 3'), for which interest revenue is calculated by applying the effective interest rate to their amortised cost (i.e. net of the expected credit loss provision).

Initial recognition and measurement

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on settlement date basis.

At initial recognition, the Group measures a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset or financial liability, such as fees and commissions. Transaction costs of financial assets and financial liabilities carried at fair value through profit or loss are expensed in profit or loss. Immediately after initial recognition, an expected credit loss allowance (ECL) is recognised for financial assets measured at amortised cost and investments in debt instruments measured at FVOCI, as described in note 2.10, which results in an accounting loss being recognised in the income statement when an asset is newly originated.

When the fair value of financial assets and liabilities differs from the transaction price on initial recognition, the Group recognises the difference as follows:

(a) When the fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e., a Level 1 input) or based on a valuation technique that uses only data from observable markets, the difference is recognised as a gain or loss.

(b) In all other cases, the difference is deferred and the timing of recognition of deferred day one profit or loss is determined individually. It is either amortised over the life of the instrument, deferred until the instrument's fair value can be determined using market observable inputs or realised through settlement.

Financial assets

Classification and subsequent measurement

The Group applies IFRS 9 and classified its financial assets in the following measurement categories:

- Fair value through profit or loss (FVPL);
- Fair value through other comprehensive income (FVOCI); or
- Amortised cost.

The classification requirements for debt and equity instruments are described below:

Debt instruments

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective, such as loans, government and corporate bonds.

Classification and subsequent measurement of debt instruments depend on:

I. the Group's business model for managing the asset; and
II. the cash flow characteristics of the asset.

Based on these factors, the Group classifies its debt instruments into one of the following three measurement categories:

a) financial assets measured at amortised cost - these represent assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest ('SPPI'), and that are not designated at FVPL. The carrying amount of these assets is adjusted by any expected credit loss allowance recognised and measured.

b) financial assets measured at FVOCI – these represent financial assets that are held for collection of contractual cash flows and for selling the assets. Where the assets' cash flows represent solely payments of principal and interest, and that are not designated at FVPL, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through Other comprehensive income (OCI), except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses on the instrument's amortised cost which are recognised in the income statement. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in income. Interest income from these financial assets is included in 'Interest income' using the effective interest rate method.

c) assets that do not meet the criteria for Amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss is presented in the income statement within 'Net gains on financial instruments classified as fair value through profit or loss' in the period in which it arises, unless it arises from debt instruments that were designated at fair value or which are not held for trading, in which case they are presented separately in income. Interest income from these financial assets is included in 'Interest income' using the effective interest rate method.

Business model assessment

The Group assesses the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. The information considered includes:

SPPI Test

Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Group assesses whether the financial instruments' cash flows represent solely payments of principal and interest (the 'SPPI test'). In making this assessment, the Group considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest. The Group reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent, and none occurred during the period.

Equity Instruments

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets.

The Group subsequently measures all equity investments at fair value through profit or loss, except where management has elected, at initial recognition, to irrevocably designate an equity investment at fair value through other comprehensive income. The Group's policy is to designate equity investments as FVOCI when those investments are held for purposes other than to generate investment returns. When this election is used, fair value gains and losses are recognised in OCI and are not subsequently reclassified to profit or loss, including on disposal. No impairment loss is recognized on equity investments. Dividends, when representing a return on such investments, continue to be recognised in the income statement as other income when the Group's right to receive payments is established. Gains and losses on equity investments at FVPL are included in the "Net gains on financial instruments held for trading" line in the income statement.

Derivative financial instruments

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. Derivative financial instruments are carried as assets when fair value is positive and as liabilities when fair value is negative.
Changes in fair values are recognised immediately in the income statement. The Group's derivative transactions consist of foreign exchange forward and swap transactions as at the balance sheet date.

Modifications of financial assets

The Group sometimes renegotiates or otherwise modifies the contractual cash flows of loans to customers. When this happens, the Group assesses whether or not the new terms are substantially different to the original terms.
The Group does this by considering, among others, the following factors:

- If the borrower is in financial difficulty, whether the modification merely reduces the contractual cash flows to amounts the borrower is expected to be able to pay.
- Whether any substantial new terms are introduced, such as a profit share/equity-based return that
- substantially affects the risk profile of the loan.
- Significant extension of the loan term when the borrower is not in financial difficulty.
- Significant change in the interest rate.
- Change in the currency the loan is denominated in.
- Insertion of collateral, other security or credit enhancements that significantly affect the credit risk associated with the loan.

If the terms are substantially different, the Group derecognises the original financial asset and recognises a 'new' asset at fair value and recalculates a new effective interest rate for the asset. The date of renegotiation is consequently, considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. However, the Group also assesses whether the new financial asset recognised is deemed to be credit-impaired at initial recognition, especially in circumstances where the renegotiation was driven by the debtor being unable to make the originally agreed payments. Differences in the carrying amount are also recognised in profit or loss as a gain or loss on derecognition If the terms are not substantially different, the renegotiation or modification does not result in derecognition, and the Group recalculates the gross carrying amount based on the revised cash flows of the financial asset and recognises a modification gain or loss in profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets).

Derecognition other than on a modification

Financial assets, or a portion thereof, are derecognised when the contractual rights to receive the cash flows from the assets have expired, or when they have been transferred and either;
(i) the Group transfers substantially all the risks and rewards of ownership, or
(ii) the Group neither transfers nor retains substantially all the risks and rewards of ownership and the Group has not retained control.
The Group enters into transactions where it retains the contractual rights to receive cash flows from assets but assumes a contractual obligation to pay those cash flows to other entities and transfers substantially all of the risks and rewards. These transactions are accounted for as 'pass through' transfers that result in derecognition if the Group:
(i) Has no obligation to make payments unless it collects equivalent amounts from the assets;
(ii) Is prohibited from selling or pledging the assets; and
(iii) Has an obligation to remit any cash it collects from the assets without material delay.

Collateral furnished by the Group under standard repurchase agreements and securities lending and borrowing transactions are not derecognised because the Group retains substantially all the risks and rewards on the basis of the predetermined repurchase price, and the criteria for derecognition are therefore not met. This also applies to certain securitisation transactions in which the Group retains a subordinated residual interest.

Financial liabilities

Classification and measurement

In both the current and prior period, financial liabilities are classified as subsequently measured at amortised cost, except for:

- Financial liabilities at fair value through profit or loss: this classification is applied to derivatives, financial liabilities held for trading (e.g., short positions in the trading booking) and other financial liabilities designated as such at initial recognition. Gains or losses on financial liabilities designated at fair value through profit or loss are presented partially in other comprehensive income (the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability, which is determined as the amount that is not attributable to changes in market conditions that give rise to market risk) and partially profit or loss (the remaining amount of change in the fair value of the liability). This is unless such a presentation would create, or enlarge, an accounting mismatch, in which case the gains and losses attributable to changes in the credit risk of the liability are also presented in the income statement.

- Financial liabilities arising from the transfer of financial assets which did not qualify for derecognition, whereby a financial liability is recognised for the consideration received for the transfer. In subsequent periods, the Group recognises any expense incurred on the financial liability; and
- Financial guarantee contracts and loan commitments

Derecognition of financial liabilities

Financial liabilities are derecognised when they are extinguished (i.e., when the obligation specified in the contract is discharged, cancelled or expires). The exchange between the Group and its original lenders of debt instruments with substantially different terms, as well as substantial modifications of the terms of existing financial liabilities, are accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability.

In addition, other qualitative factors, such as the currency that the instrument is denominated in, changes in the type of interest rate, new conversion features attached to the instrument and change in covenants are also taken into consideration. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognised as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred adjust the carrying amount of the liability and are amortised over the remaining term of the modified liability.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2024

Category (as defined by IFRS 9)	Classes as determined by the Group	Subclasses
Financial Assets Measured at Fair Value Through Profit or Loss (FVTPL)	Debt Securities	Treasury Bills
		Federal Government of Nigeria Bonds
		Euro Bonds
	Derivative Financial Instruments	Foreign Exchange Forward Contracts
		Currency Swaps
		Convertibe Loans
	Trading Assets	Assets under Reverse Repurchase Agreements
	Equity Securities	Quoted Equity Securities
	Mutual Funds	Listed Mutual Funds
Financial Assets Measured at Fair Value Through Other Comprehensive Income (FVOCI)	Debt Securities	Treasury Bills
		Federal Government of Nigeria Bonds
		Corporate Bonds
		Euro Bonds
		Promissory Notes
		Unquoted Equities
Financial Assets Measured at Amortised Cost	Debt Securities	Federal Government of Nigeria Bonds
	Cash and Bank Balances	Cash
		Operating Balances with Central Bank of Nigeria
		Balances with Banks in Nigeria
		Balances with Banks outside Nigeria
	Loans and Advances to Banks	Placements with Discount Houses
		Placements with Other Financial Institutions
	Loans and Advances to Customers	Term Loans, Overdrafts
		Sundry and Employee Loans
Financial Liabilities at Fair Value Through Profit or Loss	Derivative Financial Liabilities	Foreign Exchange Forward Contracts
		Currency Swaps
	Trading Liabilities	Liabilities under Repurchase Agreements
Financial Liabilities Measured at Amortised Cost	Due to Banks and Other Financial Institutions	Call Borrowings
		Secured Borrowings
		Refinanced LCs
		Trade Related Obligations to Foreign Banks
	Due to Customers	Demand Deposits
		Term Deposits
		Customer accounts for Foreign Trade
	Other Liabilities	Accounts Payable, Provisions
		Sundry Accounts
	Debt Secutities Issued	FSDH Commercial Paper
	Other Borrowed Funds	On-Lending Facilities

e) Impairment

The Group assesses on a forward-looking basis the expected credit losses (ECL) associated with its debt instrument assets carried at amortised cost and fair value through other comprehensive income and with the exposure arising from loan commitments and financial guarantee contracts.
IFRS 9 outlines a 'three-stage' model for impairment based on changes in credit quality since initial recognition as summarised below:

- A financial instrument that is not credit-impaired on initial recognition is classified in 'Stage 1' and has its credit risk continuously monitored by the Group.
- If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is moved to 'Stage 2' but is not yet deemed to be credit impaired.
- If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'.
- Financial instruments in Stage 1 have their ECL measured at an amount equal to the portion of lifetime expected credit losses that result from default events possible within the next 12 months. Instruments in
- Stages 2 or 3 have their ECL measured based on expected credit losses on a lifetime basis.
- A pervasive concept in measuring ECL in accordance with IFRS 9 is that it should consider forward-looking information.
- Purchased or originated credit-impaired financial assets are those financial assets that are credit-impaired on initial recognition. Their ECL is always measured on a lifetime basis (Stage 3).

The key judgements and assumptions adopted by the Group in addressing the requirements of the standard are discussed below:

Significant increase in credit risk (SICR)

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and expert credit assessment including forward-looking information. The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by:

- identifying the rating classification at initial recognition i.e. investment grade or speculative grade
- comparing the initial rating as at initial recognition with the current rating
- four notches downward movement in a twenty-five notches scale is considered significant
- for loans initially recognized as investment grade, a drop to speculative grade is considered significant
- for corporate debt issue, two notches downgrade of the issuer rating is considered significant
- for all facilities an upward reclassification of rating to the rating captured at its initial recognition or higher is considered a significant reduction in credit risk and a probationary period of 30 days is triggered.

The criteria for determining whether credit risk has increased significantly vary by portfolio and include quantitative and qualitative factors. Using its expert credit judgement and where possible relevant historical experience, the Group may determine that an exposure has undergone a significant increase in credit risk based on qualitative

indicators that it considers are indicative of such and whose effect may not otherwise be fully reflected in its quantitative analysis on a timely basis.
As a backstop, the Group considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due. There is a rebuttable presumption that the credit risk has increased significantly if contractual payments are more than 30 days past due; this presumption is applied unless the Group has reasonable and supportable information demonstrating that the credit risk has not increased significantly since initial recognition. The number of days past due is determined by counting the number of days since the date the full payment has not been received. Due dates are determined without considering any grace period that might be available to the borrower. The Group monitors the effectiveness of the criteria used to identify significant increases in credit risk by regular reviews to confirm that:

- the criteria can identify significant increases in credit risk before an exposure is in default; and
- there is no unwarranted volatility in loss allowance from transfers between 12-month PD (stage 1) and lifetime PD (stage 2).

The Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following quantitative, qualitative or backstop criteria have been met:

Qualitative criteria

For large portfolios, if the borrower is on the Watchlist and/or the instrument meets one or more of the following criteria:
- Significant increase in credit spread.
- Significant adverse changes in business, financial and/or economic conditions in which the borrower operates.
- Actual or expected forbearance or restructuring.
- Actual or expected significant adverse change in operating results of the borrower.
- Significant change in collateral value (secured facilities only) which is expected to increase risk of default.
- Early signs of cashflow/liquidity problems such as delay in servicing of trade creditors/loans.

The assessment of SICR incorporates forward-looking information. In relation to corporate and treasury financial instruments, where a Watchlist is used to monitor credit risk, this assessment is performed at the counterparty level. The criteria used to identify SICR are monitored and reviewed annually for appropriateness by the Risk Management Team.

Backstop

A backstop is applied, and the financial instrument considered to have experienced a significant increase in credit risk if the borrower is more than 30 days past due on its contractual payments.
The Group has not used the low credit risk exemption for any financial instruments in the year ended 31 December 2024.

Definition of default and credit-impaired assets

The Group defines default as the failure of counterparties to meet the financial and legal obligations including a deviation from the conditions associated with the transaction.
Credit risk default arises from the failure of an obligor of the Group to repay principal or interest at the stipulated time or failure otherwise to perform as agreed. This risk is compounded if the assigned collateral only partly covers the claims made to the borrower, or if its valuation is exposed to frequent changes due to changing market conditions (i.e. market risk).
This definition is fully aligned with the definition of credit-impaired and is triggered when it meets one or more of the following criteria:

Quantitative criteria

The borrower is more than 90 days past due on its contractual payments.

Qualitative criteria

The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to
- actions such as realizing security (if any is held); or
- the borrower is past due more than 90 days on any material credit obligation to the Group. Overdrafts are considered as being past due once the customer has breached an advised limit or been advised of a limit smaller than the current amount outstanding. In assessing whether a borrower is in default, the Group considers indicators that are:

✓ qualitative – e.g., breaches of covenant.

✓ quantitative – e.g., overdue status and non-payment on another obligation of the same issuer to the Group; and

✓ based on data developed internally and obtained from external sources. Inputs into the assessment of whether a financial instrument is in default and the significance may vary over time to reflect changes in circumstances. The definition of default largely aligns with that applied by the Group for regulatory capital purposes.

The Group incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL. This is based on advice from the Group's Risk Management Department.

The Group formulates a 'base case' view of the future direction of relevant economic variables as well as a representative range of other possible forecast scenarios. This process involves developing two more additional economic scenarios and considering the relative probabilities of each outcome.

External information includes economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Group operates, some international organizations such as the OECD and the International Monetary Fund and selected private-sector and academic forecasters.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2024

The base case represents a most-likely outcome and is aligned with information used by the Group for other purposes such as strategic planning and budgeting. The other scenarios represent more optimistic and more pessimistic outcomes. On an annual basis, the Group carries out stress testing of more extreme shocks to calibrate its determination of these other representative scenarios. The Group has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

The factors the Group considers are as shown below:

Stages	Applicable ECL	Criteria (Quantitative)	Criteria (Qualitative)
Stage 1	12-Month ECL	Less than 30 days past due	All loans upon initial recognition
Stage 2	Lifetime ECL - Loans that have witnessed significant increase in credit risk	Internal or external rating downgrade from investment grade to non-investment grade	Forbearance by CBN
		Four notches downward movement in a 25-notch scale rating	Negative modification/restructure to the original loan agreement e.g. for easing the cash flow burden on the obligor
		One notch internal and external rating downgrade of loans for non-investment grade loans	Verified poor credit risk status from credit bureau
		Obligation with past due exceeding 30 days	Changes in regulatory, economic or business of the borrower that results in a significant change in the borrower's ability to meet its debt obligations (e.g. a decline in the demand for the borrower's sales product because of a shift in technology)
		Increase of more than 300bps in yield spread over corresponding Federal Government instrument for corporate debt issue	Overdue status of non-payment on another obligation of the same issuer to the Group
		For corporate debt issue, three notches downgrade of the issuer rating	
Stage 3	Lifetime ECL - Loans that have objective evidence of impairment or in default	Obligation with past due exceeding 90 days	Obligation with past due exceeding 90 days
		Internal and external rating downgrade to **"c"** rating	Internal and external rating downgrade to **"c"** rating

The days past due default definition used by the Group as criteria in the credit classification for loan loss provisioning is consistent with the nature and observable trends in the credit of the Group. Forward-looking economic information is also included in determining the 12-month and lifetime PD, EAD and LGD. These assumptions vary by product type. The assumptions underlying the ECL calculation – such as how the maturity profile of the PDs and how collateral values change etc. – are monitored and reviewed on an annual basis.

Forward-looking information incorporated in the ECL models.

The assessment of SICR and the calculation of ECL both incorporate forward-looking information. The Group has performed historical analysis and identified the key economic variables impacting credit risk and expected credit losses for each portfolio.
These economic variables and their associated impact on the PD, EAD and LGD vary by financial instrument. Expert judgment has also been applied in this process. Forecasts of these economic variables (the "base economic scenario") are provided by the Group's economic and research team on a quarterly basis and provide the best estimate view of the economy over the next five years. The impact of these economic variables on the PD, EAD and LGD has been determined by performing statistical regression analysis to understand the impact changes in these variables have had historically on default rates and on the components of LGD and EAD.

In addition to the base economic scenario, the Group's Research team also provide other possible scenarios along with scenario weightings. Three other scenarios were used to ensure non-linearities are captured. The number of scenarios and their attributes are reassessed at each reporting date. The scenario weightings are determined by a combination of statistical analysis and expert credit judgement, taking account of the range of possible outcomes each chosen scenario is representative of. The assessment of SICR is performed using the Lifetime PD under each of the base, and the other scenarios, multiplied by the associated scenario weighting, along with qualitative and backstop indicators. This determines whether the whole financial instrument is in Stage 1, Stage 2, or Stage 3 and hence whether 12-month or lifetime ECL should be recorded.

Following this assessment, the Group measures ECL as either a probability weighted 12-month ECL (Stage 1), or a probability weighted lifetime ECL (Stages 2 and 3). These probability weighted ECLs are determined by running each scenario through the relevant ECL model and multiplying it by the appropriate scenario weighting (as opposed to weighting the inputs).

As with any economic forecasts, the projections and likelihoods of occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different to those projected. The Group considers these forecasts to represent its best estimate of the possible outcomes and has analysed the nonlinearities and asymmetries within the Group's different portfolios to establish that the chosen scenarios are appropriately representative of the range of possible scenarios.

Estimation of multi-year exposure at default

Exposure at Default (EAD) is an estimate of the Group's exposure to its counterparty at the time of default. This estimation (EAD) relates to payment terms, tenure of exposure and the point in time at which default is expected, or actually occurs. For defaulted accounts, the Group uses the principal amount outstanding and the accrued interest at the point of default as the EAD. Prepayment is primarily an option to borrower to make bulk payment (full or partial) for the availed facility ahead of its scheduled time.

EAD Estimation for certain exposure facilities

Under this category, future exposure to the facility is known, as the counterparty cannot increase its exposure beyond contractual drawdown schedule. All forms of term loans including amortizing loans, step-up/step-down loans, bullet loans fall under this category, provided there is no prepayment option.
Periodic and Daily amortization schedule are generated using both contractual and computed effective interest rate (EIR).

Estimation of multi-year loss given default

Definition of LGD Parameters

Loss Given Default (LGD) parameter is defined as a percentage of exposure that the Group expects not to collect if default occurs on the contract. It is the complement of the Recovery Rate which is the percentage of exposure that the Group expects to recover in the event that there is a default.

Collateral: This is a property or other asset that a borrower offers as a way for a lender to secure the loan. Since collateral offers some security to the lender should the borrower fail to pay back the loan, loans that are secured by collateral typically have lower credit risk spreads than unsecured loans.

Haircut: The amount of the haircut reflects the lender's perceived risk of loss from the asset falling in value or being sold in a forced sale. Haircut is expressed as a percentage of the collateral's market value.

Discount Rate: This is the rate used to discount all estimated recovered cash flows from the period of collection to the period of default. The contractual interest rate is used as EIR for stage 3 facilities, while the EIR is used for other stages. Effective interest rate (EIR) is defined as the rate that exactly discounts future contractual cash payments through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or to the amortized cost of a financial liability.

Measuring ECL – Explanation of inputs, assumptions and estimation techniques

The Expected Credit Loss (ECL) is measured on either a 12-month (12M) or Lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

• The PD represents the likelihood of a borrower defaulting on its financial obligation (as per “Definition of default and credit-impaired” above), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.

• EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For example, for a revolving commitment, the Group

includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.
• Loss Given Default (LGD) represents the Group's expectation of the extent of loss on a defaulted exposure.
LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD). LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The Lifetime PD is developed by applying a maturity profile to the current 12M PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis.
The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type.

• For amortising products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12month or lifetime basis. This will also be adjusted for any expected overpayments made by a borrower. Early repayment/refinance assumptions are also incorporated into the calculation.

• For revolving products, the exposure at default is predicted by taking current drawn balance and adding a "Credit Conversion Factor" which allows for the expected drawdown of the remaining limit by the time of default. These assumptions vary by product type and current limit utilisation band, based on analysis of the Group's recent default data. The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. These vary by product type.

• For secured products, this is primarily based on collateral type and projected collateral values, historical discounts to market/book values due to forced sales, time to repossession and recovery costs observed.

• For unsecured products, LGD's are typically set at 45% as proposed by BASEL III. Forward-looking economic information is also included in determining the 12-month and lifetime PD, EAD and LGD.

Qualitative Criteria: PDs are assigned by grouping facilities based on a shared risk characteristic, i.e. homogeneous group. The FSDH internal rating of the obligor was used as the relevant shared characteristic for Top-Down Approach.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2024

Credit Rating	Score	Investment Decision	Obligor Description
Aaa	Above 92	Investment Grade	Impeccable financial condition. Overwhelming capacity to meet obligations in a timely manner
Aa+	75 to 92		Very good financial condition. Very strong capacity to meet obligations in a timely manner.

The impact of macro-economic variables on non-performance is determined by the model and applied on ECL level. Factors considered include:

- Exchange Rate
- Inflation
- Brent Crude Price

Data consideration included values from 2010 to 2024 and forecast for 2025 to 2029.

PROBABILITY-WEIGHTED ECL COMPUTATION

A key aspect of IFRS 9 is the introduction of forward-looking estimates into the impairment calculation. The Group incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL.

This is based on advice from the Bank's Risk Management and Research Departments which have been equipped with relevant tools. The Group formulates a 'base case' view of the future direction of relevant economic variables as well as a representative range of other possible forecast scenarios. This process involves developing two more additional economic scenarios and considering the relative probabilities of each outcome.
External information includes economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Group operates, some international organizations such as the OECD and the International Monetary Fund and selected private-sector and academic forecasters.

The base case represents a most-likely outcome and is aligned with information used by the Group for other purposes such as strategic planning and budgeting. The other scenarios represent more optimistic and more pessimistic outcomes. On an annual basis, the Group carries out stress testing of more extreme shocks to calibrate its determination of these other representative scenarios.

Presentation of allowance for ECL in the statement of financial position

An allowance for credit losses (ECL) is established for all financial assets, except financial assets classified or designated at FVTPL and equity securities as FVOCI, which are not subject to impairment assessment. Allowance for credit losses are presented in the statement of financial position as follows:

- Debt instruments measured at FVOCI: No ECL is recognized in the statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and recognized in the fair value reserves in equity.
- Financial assets measured at amortised costs including loans, overdrafts and debt securities: ECL is a deduction from the gross carrying amount of these assets and they are presented net of ECL on the statement of financial position. ECL on loans is presented as Allowance for credit losses – loans and advances.
- Off balance sheet items such as undrawn loan commitments and financial guarantee contacts: Expected credit losses are calculated and included in Other Liabilities – Provisions.

f) Financial guarantee contracts and loan commitments

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to Groups, financial institutions and others on behalf of customers to secure loans, overdrafts and other Grouping facilities.
Financial guarantee contracts are initially measured at fair value and subsequently measured at the higher of:
• The amount of the loss allowance; and
• The premium received on initial recognition less income recognised in accordance with the principles of IFRS 15.

Loan commitments provided by the Group are measured as the amount of the loss allowance. The Group has not provided any commitment to provide loans at a below-market interest rate, or that can be settled net in cash or by delivering or issuing another financial instrument. For loan commitments and financial guarantee contracts, the loss allowance is recognised as a provision.

However, for contracts that include both a loan and an undrawn commitment and the Group cannot separately identify the expected credit losses on the undrawn commitment component from those on the loan component, the expected credit losses on the undrawn commitment are recognised together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the loan, the expected credit losses are recognised as a provision.

g) Write-offs

Loans and debt securities are written off (either partially or in full) when there is no realistic prospect of recovery. This is generally the case when the Group determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due. Whenever previously written off loans are recovered, such amount recovered is recognized as other income in the statement of comprehensive income.

h) Offsetting financial instruments

Financial assets and liabilities are offset, and the net amount presented in the statement of financial position when, and only when, the Group has currently enforceable a legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously. The financial assets and liabilities are presented on a gross basis. Income and expenses are presented on a net basis only when permitted by accounting standards, or for gains and losses arising from a Group of similar transactions such as in the Group's trading activity.

i) Borrowing cost

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

j) Dividend income

Dividend income is recognised in the consolidated statement of comprehensive income when the entity's right to receive payment is established.

k) Impairment of non-financial asset

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or group of assets (Cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

l) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

m) Property and equipment

(i) Recognition and measurement
Property and equipment are stated at historical cost less depreciation. Historical cost includes expenditures that are directly attributable to the acquisition of the items. Cost may also include transfers from equity of any gains or losses on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance costs are charged to the income statement during the reporting period in which they are incurred.

An asset's net book value is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Gains and losses on disposals are determined by comparing proceeds with net book values. These are included in the income statement.

(ii) Depreciation
Depreciation is recognised in the statement of comprehensive income on a straight-line basis to write down the cost of each asset, to their residual values over the estimated useful lives of each part of an item of property and equipment. Leased assets under finance lease are depreciated over the shorter of the lease term and their useful lives.
Depreciation begins when an asset is available for use and ceases at the earlier of the date that the asset is derecognised or classified as held for sale in accordance with IFRS 5. A non-current asset or disposal group is not depreciated while it is classified as held for sale.

The estimated useful lives for the current and comparative periods are as follows:
Leasehold improvements over the shorter of the useful life of the item or lease term. Land is not depreciated.

-Leasehold improvements - 25% or over the lease period
-Office equipment - 20%
-Computer equipment - 33%
-Office Furniture and fittings - 12.5% - 25%
-Motor vehicles - 25%

-Work in progress - 0%
Depreciation methods, useful lives and residual values are reassessed at each reporting date.

(iii) De-recognition
An item of property and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in statement of comprehensive income in the year the asset is derecognised.

n) Intangible assets

Costs associated with maintaining software programs are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the group are recognised as intangible assets when the following criteria are met:
• it is technically feasible to complete the software so that it will be available for use
• management intends to complete the software and use or sell it
• there is an ability to use or sell the software
• it can be demonstrated how the software will generate probable future economic benefits
• adequate technical, financial and other resources to complete the development and to use or sell the software is available, and
• the expenditure attributable to the software during its development can be reliably measured.

Directly attributable costs that are capitalized as part of the software include employee costs and an appropriate portion of relevant overheads. Capitalized development costs are recorded as intangible assets and amortized from the point at which the asset is ready for use. The Group chooses to use the cost model for the measurement after initial recognition. Prior to deployment for usage, such assets are classified under work in progress and are not subjected to amortization. Amortisation is calculated over 3 years on a straight-line basis. Software under development is reported at cost and are carried as work-in-progress.

o) Income tax

(a) Current income tax
Income tax payable is calculated on the basis of the tax law in Nigeria and is recognised as an expense (income) for the period except to the extent that the current tax relates to items that are charged or credited in other comprehensive income or directly to equity. Income tax payable consists of Company Income tax, Windfall tax, Tertiary Education tax, NITDEF tax and NASENI levy and Nigeria Police Trust Fund levy.

Company Income Tax: Company Income tax is assessed at a statutory rate of 30% of total profit or Dividend Declared, whichever is higher.

Windfall Tax: Windfall tax is a one-off tax levied on realised profit on foreign exchange transactions between 2023 to 2025 financial years as cited in the Finance (Amendment) Act, 2024) in Nigeria. It is recognized as an income tax expense and charged to other comprehensive income and a liability due to the tax authority for the period but was applied retrospectively to commence on 1st January 2023. The applicable rate for Windfall tax is 70%.

Tertiary Education Tax: This is computed at a rate of 3% of assessable profit for each year of assessment which is payable on a self-assessment basis.

NITDEF Tax: NITDEF tax is a 1% levy on profit before tax of the current financial year or year of assessment.

NASENI Levy: This is computed as 0.25% of profit before tax of the current financial year or year of assessment.

Nigeria Police Trust Fund Levy: This is computed as 0.005% of profit before tax of the current financial year or year of assessment.

In these circumstances, current tax is charged or credited to other comprehensive income or to equity (for example, current tax on equity instruments for which the entity has elected to present gains and losses in other comprehensive income).
Where tax losses can be relieved only by carry-forward against taxable profits of future periods, a deductible temporary difference arises. Those losses carried forward are set off against deferred tax liabilities carried in the consolidated statement of financial position.

Current tax for the current and prior periods is recognized as a liability to the extent that it has not yet been settled, and as an asset to the extent that the amounts already paid exceed the amount due. Current tax assets and liabilities are measured at the amount expected to be paid to (recovered from) tax authorities, using the rates/laws that has been enacted at the balance sheet date.

The Group does not offset current income tax liabilities and current income tax assets.

(b) Deferred income tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the date of the consolidated statement of financial position and are expected to apply when the related deferred income tax asset is realised, or the deferred income tax liability is settled.

The principal temporary differences arise from depreciation of property, plant and equipment, revaluation of certain financial assets and liabilities, provisions for gratuity and carry forwards. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit nor loss.

The tax effects of carry forwards of unused losses, unused tax credits and other deferred tax assets are recognised when it is probable that future taxable profit will be available against which these losses and other temporary differences can be utilised. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of the asset or liability and is not discounted. Deferred tax assets are reviewed at each balance sheet date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised. Deferred income tax is provided on temporary differences arising from investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the difference will not reverse in the foreseeable future.

Deferred tax related to fair value re-measurement of available for sale instruments, which are recognised in other comprehensive income, is also recognised in other comprehensive income and subsequently in the income statement together with the deferred gain or loss.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same tax authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

(c) Minimum Tax
Minimum Tax is computed as 0.5% of Gross Turnover less any franked investment income for any financial year or year of assessment.

p) Employee benefits

The Group in addition to its defined contribution scheme under the Pension Reform Act, also sponsors a post-employment plan under which entities within the Group contribute a percentage of employees' basic salary to a fund manager in favour of the employees. The amount of the post-employment benefits received by the employee is determined by the number of contributions paid by the company to the post-employment benefit plan, together with investment returns arising from the contributions. Thus, actuarial risk (that benefits will be less than expected) and investment risk fall on the employee.

(a) Post-employment benefits
The Company operates a defined contribution scheme in line with the subsisting Pension Act 2014 where employees are entitled to join the scheme on confirmation of their employment. The employee and the Company contribute 6% and 12% respectively of the employee's basic salary, transport and rent allowances. The Company has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expenses when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

(b) Post-employment defined contribution plan
The group sponsors a post-employment defined contribution plan under which entities within the group contribute a percentage of employees' basic salary to a fund manager in favour of the employees. The amount of the post-employment benefits received by the employee is determined by the number of contributions paid by the company to the post-employment benefit plan, together with investment returns arising from the contributions. Thus, actuarial risk (that benefits will be less than expected) and investment risk fall on the employee.

(c) Short-term employee benefits
Short-term employee benefit obligations are measured at undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Bank has a present or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

q) Provisions, contingent liabilities and assets

Provisions are liabilities that are uncertain in amount and timing. Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is more likely than not that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Where there is a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation.

A contingent liability is a possible obligation that arises from a past event and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group or the Group has a present obligation as a result of a past event. It is not recognised because it is not likely that an outflow of resources will be required to settle the obligation, or the amount cannot be reliably estimated. Contingent liabilities normally comprise of legal claims under arbitration or court process in respect of which a liability is not likely to occur.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. Contingent assets are not recognised as assets in the consolidated statement of financial position but is disclosed if they are likely to eventuate.

r) Share capital

(a) Share issue costs

Incremental costs directly attributable to the issue of new shares or options or to the acquisition of a business are shown in equity as a deduction, net of tax, from the proceeds.

(b) Dividends on ordinary shares
Dividends on ordinary shares are recognised in equity in the period in which they are approved by the Group's shareholders. Dividends for the year that are declared after the date of the consolidated statement of financial position are dealt with in the subsequent events note. Dividends proposed by the Directors' but not yet approved by members are disclosed in the financial statements in accordance with the requirements of the Company and Allied Matters Act (CAMA) 2020.

(c) Statutory Reserve

Nigerian Banking regulations require the Bank to make an annual appropriation to a statutory reserve. As stipulated by S.16 (1) of the Banks and Other Financial Institutions Act (BOFIA) 2020, an appropriation of 30% of profit after tax is made if the statutory reserve is less than paid-up share capital and 15% of profit after tax if the statutory reserve is greater than the paid-up share capital.

(d) Credit Risk Reserve

In compliance with the Prudential Guidelines for Licensed Banks, the Bank assesses qualifying financial assets using the guidance under the Prudential Guidelines. These apply objective and subjective criteria towards providing for losses in risk assets. Assets are classified as performing or non-performing. Non-performing assets are further classed as Substandard, Doubtful or Lost with attendants' provision as per the table below based on objective criteria.

Classification	**Basis**	**Percentage provided**
Substandard	Interest and/or principal overdue by 90 days but less than 180 days.	10%
Doubtful	Interest and/or principal overdue by more than 180 days but less than 365 days.	50%
Lost	Interest and/or principal overdue by more than 365 days.	100%

A more accelerated provision may be done using the subjective criteria. A 1% provision is taken on all risk assets not specifically provisioned. The results of the application of Prudential Guidelines and the impairment determined for these assets under IFRS 9 are compared. The IFRS 9 determined impairment charge is always included in the income statement. Where the Prudential Guidelines provision is greater, the difference is appropriated from Retained Earnings and included in a non-distributable reserve called "Credit Risk Reserve". Where the IFRS 9 impairment is greater, no appropriation is made and the amount of the IFRS 9 impairment is recognised in the Statement of Comprehensive Income.

All provisions determined under Prudential Guidelines are compared with that of IFRS in line with the CBN guidelines.

s) Earnings per share

The Group presents basic and diluted earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit after tax attributable to ordinary shareholders of the Group by the weighted average number of ordinary shares outstanding during the period excluding treasury shares. Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares.

t) Comparatives

Except when a standard or an interpretation permits or requires otherwise, all amounts are reported or disclosed with comparative information. Where IAS 8 applies, comparative figures have been adjusted to conform to changes in presentation in the current year.

u) Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest thousands of naira unless otherwise stated.

4 Enterprise Risk Management Review

Management is fully aware that every financial, operational or strategic decision made may either adversely affect or strengthen our ability to meet the Bank's organizational objectives. Management is also aware of the need to balance the contradictory pressures of greater entrepreneurialism with losses from downside risks. Thus, risk is seen as the level of exposure – opportunity, threat, and uncertainty that must be identified, understood, measured and effectively managed, as the Bank's executes its strategies to achieve its business objectives and create value.

The risks associated with the Bank’s businesses include - financial risks (which consist of credit, market, and liquidity risk), operational risk, concentration risk, reputational risk, interest rate risk, downgrade risk, business risk, regulatory compliance risk and environment and social risk. For the Bank to achieve long term success, it must manage all chosen opportunities and identified threats effectively within the Bank's risk appetite.

The risk management philosophy and culture are the set of shared beliefs, values, attitudes and practices that govern how Management considers the risks inherent in the Bank’s business activities, from strategy development and implementation to day-to-day activities.

Management’s risk philosophy is conservative. We believe that a sound risk management system is the foundation for building a vibrant and viable financial institution. Therefore, an enterprise-wide approach to risk management has been adopted, wherein key risks, financial and non- financial, from all areas of the business are managed within the context of the Bank’s risk appetite.

Consequent upon its risk management philosophy, the Bank strives to embed the following guiding principles of its risk culture into its daily practices:

(a) The Bank insists on a robust risk management governance structure that enables it to manage all major aspects of its activities through an integrated planning and review process that includes strategic, financial, customer and risk planning.

(b) Our Board and Senior Management insists on and promotes a strong culture of adherence to limits in managing risk exposure.

(c) Risk management in the Bank is governed by formally documented and defined policies and procedures, which are clearly communicated to all.

(d) The Bank avoids products, businesses and markets that it does not fully understand or for which management cannot reasonably and objectively measure and manage the associated risks.

(e) The Bank strives to maintain a balance between risk/opportunity and revenue consideration with its risk appetite. Thus, risk-related issues are considered in all our business decisions.

(f) The Bank creates and evaluates business units and enterprise risk profiles to consider what is best for its individual Bank's units and the Bank as a whole.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2024

(g) The Bank's risk officers are empowered to perform their duties professionally and independently within clearly defined authorities.

(h) Staff are encouraged to disclose inherent risks and actual losses openly, fully, honestly and quickly.

(i). The Bank creates a process for institutionalising the lessons learned from risk events and penalises negligent recurrence.

(j) The Bank has zero tolerance for breach of laws and regulations.

(k) The Bank has zero appetite for associating with disreputable individuals and organisations

Our risk management objectives are to:

- Identify our material risks and ensure that our business plans are consistent with our risk appetite.
- Ensure that our business growth plans are properly supported by an effective and efficient risk management function.
- Manage our risk profile, ensuring that specific financial deliverables remain possible under a range of possible business conditions.
- Optimise our risk and return trade-off by ensuring that our business units act as primary risk managers while establishing strong and independent review and challenge structures.
- Protect the Bank against unexpected losses and reduce the volatility of our earnings.
- Maximise risk-adjusted opportunities, earnings potential and ultimately our stakeholder value.
- Help Management improve the control and coordination of risk-taking across the Bank.
- Build a risk-smart workforce and environment that allows for innovation and responsible risk-taking by our staff while ensuring cost-effective and legitimate precautions are taken to protect the shareholders' interest.

The Bank's risk appetite articulates the quantum of residual risk it is prepared to accept or tolerate in pursuit of its strategic business objectives.

The Risk Management department periodically recommends specific measures relating to these parameters to the Board for approval. The risk appetite guides in setting the parameters listed below:

Financial

- Financial and prudential ratios are set to meet the minimum statutory requirements
- Capital-at-risk driven by the Bank's shareholder value creation objectives.
- Capital adequacy is set to exceed the minimum regulatory limits.

Credit

- Asset quality, measured by the ratio of non-performing loans to total loans.
- Maximum credit exposure per industry, product, obligor.
- Zero tolerance for undisciplined lending.

Reputational

- Favourable reports from external auditors and rating agencies.
- Zero tolerance for any utterance (by directors or employees) that may impact negatively on the Bank's operations.
- Zero appetite for association with disreputable individuals and organisations.
- Zero appetite for unethical or illegal and/or unprofessional conduct by our directors, executive management and staff.

Ratings

The Bank aims to achieve consistently good ratings issued by domestic or internationally recognised rating agencies. The ratings must reflect sound financial asset quality, strong liquidity position, strong capital adequacy level, strategic positioning in the fundamentals, excellent economy and potential for superior earnings.

Customer Service

- Acceptable customer attrition level as defined by the Board.
- Minimum acceptable percentage of satisfied customers from feedback surveys.
- Acceptable complaints volume.

Regulatory

- Zero amount or number of sanctions by the CBN and other regulatory agencies.
- Zero tolerance for infractions and non-compliance with laws.

Market Risk

The following are the objectives for managing market risk in the Bank:

- Maintaining market risk within limits in line with the Bank's risk appetite.
- Identifying and accurately measuring our market risk exposure to aid efficient decision making; and
- Mitigating and monitoring our market risk exposures effectively."

The Bank in managing market risk tracks the following limits:

- Trading limit

- Stop loss limits
- Interest rate gap limits

Liquidity Risk

The Bank tracks the following limits in compliance with regulatory requirements and/or to conform to leading practices in liquidity risk management:

- Liquidity ratio set to exceed minimum regulatory limits
- Total deposits to total assets
- Duration of liquid assets
- Large fund provider to total deposits
- Capital adequacy
- Total loans to total deposits
- Total earning assets to total assets
- Aggregate large credit to shareholders funds

Senior management proposes a well-articulated risk appetite framework and recommends it to the Board for approval annually. It also establishes a process for allocating the appetite among the business units and subsidiaries and reporting against these limits.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

4.1 Financial Instruments

The Group's financial instruments as at 31 December 2024 are categorised as follows:

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

4.1.1 Credit Risk

Credit risk is the risk of financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations. It arises principally from the Bank's loans and advances to customers and other Banks, and investment in debt securities. For risk management reporting purposes, the Bank considers and consolidates all elements of credit risk exposure (such as individual obligor risk, country risk and sector risk).

4.1.2 Settlement Risk

The bank's activities may give rise to risk at the time of settlement of transactions and trades. "Settlement risk" is the risk of loss due to the failure of an entity to honour its obligations to deliver cash, securities or other assets as contractually agreed.

For certain types of transactions, the bank mitigates this risk by conducting settlements through a settlement/clearing agent to ensure that a trade is settled only when both parties have fulfilled their contractual settlement obligations. The FSDH Merchant Bank's Enterprise Risk Management (ERM) Framework and Credit Policy Manual define the overall principles under which FSDH Merchant Bank is prepared to assume credit risk. The standard sets out the overall framework for the consistent and unified governance, identification, measurement, management and reporting of credit risk in FSDH.

These policies provide a comprehensive framework within which all credit risk emanating from the operations of FSDH are legally executed, properly monitored and controlled to minimise the risk of financial loss; and assure consistency of approach in the treatment of regulatory compliance requirements. The Management Risk Committee is mandated to provide high level centralized management of credit risk for the Bank. The purpose of the Management Risk Committee is to assist the Board Risk and Credit Committee in fulfilling its oversight responsibility in exercising diligence, due care and skill to oversee, direct and review the management of credit risk within the Bank. Specifically, the roles and responsibilities of the Committee include the following:

- Credit Strategy and Policy Formulation
- Credit Approval
- Credit Monitoring
- Credit Risk Compliance

4.1.3 Principal Credit Policies

The principal credit policies guiding the Bank shields the Bank against inherent and concentration risks through all the credit levels of selection, underwriting, administration and control. Some of the policies are:

- Credit will only be extended to suitable and well identified customers.
- Exposures to any industry or customer will be determined by the regulatory guidelines, clearly defined internal policies, debt service capability and balance sheet management guidelines.
- Credit will not be extended to customers where the source of repayment is unknown or speculative and also where the destination of the funds is unknown. There must be a clear and verifiable purpose for the use of funds.

- The primary source of repayment for all credits must be from identifiable cash flows from the counterparty's normal business operations or other financial arrangements. The realization of security remains a fall-back option.
- A pricing model that reflects variations in the risk profile of various credit facilities to ensure that higher risks are compensated with higher returns.
- All conflict-of-interest situations must be avoided.

4.1.4 Credit Risk Measurement

Over the years, the bank has expanded its operational scope and enhanced its suite of financial advisory services to its clientele. The product offerings of the bank include buying and selling of securities, term loans, invoice discounting, overdraft, commercial facilities, asset backed notes, LPO/Contract financing, trade finance, foreign exchange, bonds and guarantees, loan syndications, project finance, structured finance, corporate finance and financial advisory services (debt & equity).

Credit risk represents the loss that the bank would incur if a counterparty (such as a bank, corporate, individual or sovereign) or an issuer of securities (or other instruments the bank holds) fails to perform its contractual obligations or upon deterioration in the credit quality of third parties whose securities or other instruments it holds. Over the years, the bank has devoted resources and harnessed its credit data into developing models to improve the determination of economic and financial threats due to credit risk. As a result, some key factors are considered in credit risk measurement:

1) Adherence to strict credit selection criteria which includes a defined target market, credit history, capacity and character of the customers.

2) The possibility of failure to pay over the period stipulated in the contract.

3) The size of the facility in case default occurs

4) Estimated rate of recovery which is a measure of the portion of debt that can be regained through freezing of assets and collateral should default transpire.

Methodology for Risk Rating

For loans & receivables and placement with banks, the Bank utilises Obligor Risk Rating and Facility Risk Rating models to assign ratings to obligor and facilities in line with the Bank's Credit Policy. The Obligor Risk Rating models include the Bank Risk Rating and Corporates Risk Rating models. The Bank utilises the Bank Rating model and the Corporate Rating model to rate Bank and corporate organisations respectively. Each rating model considers qualitative and quantitative conditions of the obligor. For the quantitative analysis, a three-year history of financial position is required to adequately appraise the customer and the financial performance is benchmarked against industry averages. The qualitative section covers corporate governance issues, industry and business considerations to give a perception of the customer. In summary, the key factors considered while doing an appraisal of the customer include:

- A measure of the financial and non-financial risks of the borrower. In order to properly evaluate the non-financial risks of the borrower, a thorough industry analysis is carried out by a dedicated team in Risk Management. This is used as a benchmark for the obligor .
- Obligor rating considers the financial condition, management and ownership structure, industry and other qualitative factors of the customer.
- Facility rating recognises the risk mitigation and facility structuring as features of the credit facility. Considerations here include the nature and quality of collateral, the structure of the loan, and the nature and purpose of the loan, among others.

All ratings are reviewed annually. More frequent reviews are occasioned by unexpected developments such as policy and market changes. Changes to the obligor's status and/or capability will also trigger a review. The Bank generally avoids high risk obligors that will warrant frequent reviews and management.

The bank maintains the under listed rating grade which is applicable to both new and existing customers. A self-explanatory rating grid showing how ratings are assigned is illustrated below:

S/N	Credit Rating
1	AAA
2	AA+
3	AA
4	AA-
5	A+
6	A
7	A-
8	BBB+
9	BBB
10	BBB-
11	BB+
12	BB
13	BB-
14	B+
15	B
16	B-
17	CCC+
18	CCC
19	CCC-
20	CC+
21	CC
22	CC-

23	C+
24	C
25	C-

A "+" (plus) or "-" (minus) sign may be assigned to ratings from Aa to C to reflect comparative position within the rating category. Therefore, a rating with + (plus) attached to it is a notch higher than a rating without the + (plus) sign and two notches higher than a rating with the - (minus) sign.

4.1.5 Risk limit and control mitigation policies

The medium by which limits for banks and issuers are created is the credit appraisal memorandum (CAM). A signed CAM must evidence all types of credit lines being considered for the client. The Board of Directors of the Bank set up a Board Risk and Credit Committee (BRC) with the authority to approve credit facilities on behalf of the Board. The Board also gave the authority to grant credit approval to the Management Risk Committee (MRC). All credits in the bank are rated using the bank's internal rating model. As part of the credit appraisal process, such rating is compared and evaluated against published ratings of external rating agencies.

These ratings, apart from determining values of credit to be advanced to an obligor, also guides Management and the Board on authorisation limits for approving credit facilities. This laid down authority governs credit extension. The limits set by the Board are as indicated below:

Approving Authority	% of Single Obligor Limit/ Facility Type	Limit	Facility Rating
Management Risk Committee	Up to 95% of Single Obligor Limit (when secured by cash, FGN Bonds, FGN Sukuk bonds, FGN issued instruments, T/Bills, FX (major currencies), FSDH issued CP, FSDH issued bonds and Nigerian Sovereign Eurobonds	Up to N14.67 billion	Aa – Aaa
Management Risk Committee	Facilities with non-cash collateral	N300 million	Bbb - Aaa
Board Risk and Credit Committee (BRCC)	All facilities	Up to N6 billion	Aa - Aaa
Board Risk and Credit Committee (BRCC)	All facilities	Up to N3.7 billion	Bbb - A
Full Board	All facilities	Up to single obligor limit	Bbb- Aaa
Full Board	All facilities	Up to N1.26 billion	B - Bb
Full Board	All facilities	Up to N0.75 billion	C
Board Risk and Credit Committee (BRCC)	Facilities when secured with Commercial Papers, Guarantees or bonds of Reputable Companies (Aaa and Aa ratings). *Reputable Companies will be categorised as companies who have investment grade ratings.	Up to the Board approved limit of the Reputable Company	Aa - Aaa

The Management Risk Committee shall comprise the officers specified below, signing jointly:

- Chief Risk Officer
- Executive Directors
- Managing Director/CEO

It is pertinent to state that these limits are reviewed from time to time.

Economic variable assumptions

The most significant period-end assumption used for the ECL estimate as at 31 December 2024 and 31 December 2023 were Exchange Rate, Inflation and Crude Oil Price using Brent as the benchmark considering its ability to be forecasted into the future.

31 December 2024		**2024**	**2025**	**2026**	**2027**
Exchange Rate - Using NAFEX as reference	Base Case	1600.03	1550	1570	1820
	Optimistic Case	1191.26	1303.65	1422.51	1550.72
	Pessimistic Case	1819.40	2116.42	2515.63	2417.62
Inflation(%)	Base Case	19.51	16.83	16.07	14.71
	Optimistic Case	15.39	14.69	14.00	14.00
	Pessimistic Case	25.47	19.50	18.32	16.13
Brent Crude Price - Year on Year	Base Case	86.58	86.78	84.12	84.12
	Optimistic Case	89.25	88.87	88.00	88.00
	Pessimistic Case	84.00	83.45	79.24	79.24
31 December 2024		**2024**	**2025**	**2026**	**2027**
Brent Crude Price - Year on Year	Base Case	86.58	86.78	84.12	84.12
	Optimistic Case	89.25	88.87	88.00	88.00
	Pessimistic Case	84.00	83.45	79.24	79.24

SENSITIVITY ANALYSIS

The most significant assumptions affecting the ECL allowance was crude oil prices. Crude oil price, given the significant impact on companies' performance and collateral valuations; and Set out below are the changes to the ECL as at 31 December 2024 that would result from reasonable possible changes in this the EAD from the actual assumptions used in the bank's economic variable assumptions (for example, the impact on ECL of increasing the estimated crude oil price by 10%).

December 2024	10%	No change	-10%
Brent Crude Price	2,623,623	2,915,137	3,206,651

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2024

December 2023	10%	No change	-10%
Brent Crude Price	1,690,403	1,878,226	1,992,596

4.1.6 Collateral Policies

To minimise the risk of loss by the Bank in the event of a decline in quality or delinquency, the Bank ensures that credit exposures have appropriate collateral. Security documents are reviewed to ensure their continuous enforceability. Also, securities held against exposures are reviewed regularly to ensure realisability and value. Where diminution in value has occurred, appropriate steps are taken to shore up such positions. This is done throughout the lifetime of the credit exposure.

Collateral securities pledged to the Bank must be in negotiable form and its types include the following:

- Real estate, plant and equipment collateral (usually all asset or mortgage debenture or charge) which have to be registered and enforceable under Nigerian law.
- Collateral consisting of inventory, account receivables, floating debenture, etc, which have to be registered and, must be enforceable in Nigeria and under Nigerian law.
- Stocks and shares of publicly quoted companies
- Domiciliation of payment on contracts
- Letters of Lien

·Currently, the various types of collateral held are against our Commercial Bills and Margin facilities. They consist of stocks and shares of publicly quoted companies, real estate, letters of lien, domiciliation of payment contracts and charge on assets.

FSDH shall track, value and give or receive collateral during the eligible or applicable life of every credit transaction. General tasks on a day-to-day basis shall include:

- Managing collateral movement – record details of collateral, monitor customer exposure and collateral received or posted.
- Mark-to-market situation or position where applicable and call for margins as may be required.
- Deal with disagreements and disputes over exposure calculations and collateral valuations.
- Provide custody, clearing and settlement (depending on how the legal relationship is structured)
- Manage collateral inflows and outflows
- Do regular valuations (quarterly at the minimum) of all securities. Depending on security type (equity or fixed income), valuation can be done on an end of day (EOD) basis
- Deal with requests for collateral substitution where required.

To ensure ease of realisation of collateral in the event of non-performance, all credit documentation requirements shall be met before a credit facility is availed and where there are waivers, relationship officers and Risk Management Department must ensure that such waivers are resolved within the approved period.

As a matter of good business practice, adequate security ought to be taken from a customer, whose financial standing and track record do not justify lending on a clean basis. Clean lending situations may arise where it makes economic sense to do so based on perceived client's credit risk.

Therefore, depending on counterparty obligor/facility rating, collateral security may be waived as a pre-condition for granting the facility. Consequently, obligors with ratings below investment grade must, as a necessity, provide acceptable security before approval can be granted. Obligors with Investment Grade credit ratings may be allowed clean facility, depending on their financial standing. Accordingly, such decisions shall be taken by Management and/or the Board Risk and Credit Committee where necessary. For placements with financial institutions which consist of mainly banks, the amount of credit extended is based on the strength of the institution as shown by the Bank's internal rating model.

The Bank’s policies regarding obtaining collateral have not significantly changed during the reporting period and there has been no significant change in the overall quality of the collateral held by the Bank since the prior period.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2024

4.1.7 Maximum exposure to credit risk before collateral held or other credit enhancements

4.1.12 Financial Assets Individually Impaired

Significant loans are examined for any sign of impairment triggers. The triggers for impairments include:

- significant financial difficulty of the issuer or obligor;
- breach of contract (such as a default or delinquency in interest or principal payments);
- granting to the borrower a concession that FSDH would not otherwise consider, due to the borrower's financial difficulties;
- becoming probable that the borrower will enter bankruptcy or other financial reorganisation.
- the disappearance of an active market for that financial asset because of financial difficulties;

IFRS 9 requires an entity to test a financial instrument for impairment at the end of each reporting period. If there is objective evidence that an impairment loss on individually significant loans has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the loan's effective interest rate computed at initial recognition.

As at 31 December 2024	Loans to Customers at Amortised Costs
	N'000

4.2 Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises both currency risk and price risk. Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Price risk is the earnings risk from changes in interest rates, foreign exchange rates, and equity and commodity prices. Price risk arises in non-trading portfolios, as well as in trading portfolios. The objective of market risk management is to manage and control market risk exposure within acceptable parameters while optimising the return on risk.

4.2.1 Management of market risk

The Risk Management unit is mandated to assess, monitor and manage market risk for the Bank. The primary objective of the Risk Management unit is to establish a comprehensive and independent market risk control framework.
The Group's market risk objectives, policies and processes are aimed at instituting a model that objectively identifies, measures and manages market risk in the Group and ensure that:

- The individuals who take or manage risk clearly understand it
- The Group's risk exposure is within established limits
- Risk taking decisions are in line with business strategy and objectives set by the Board of Directors
- The expected payoffs compensate for the risks taken;
- Sufficient capital, as a buffer, is available to take risk

4.2.2 Market risk measurement

The Group currently applies Non-Value at Risk measures in the measurement and management of market risks. The techniques currently used to measure and control market risk include:

Position Limit
The Board of Directors with the input of Risk Management unit sets limits on the aggregate trading portfolio for overnight positions. This limit, which is a product of our model tracking factor sensitivity, is reviewed frequently depending on market volatility.

Trading Limit
Risk Management unit has put in place trading limit for all securities traders. Limits have been set based on experience and hierarchy, as it would be risky for traders to have equal ability to commit the Bank. Limits are reviewed annually.

Mark-to-Market
The Risk management unit, independent of the Treasury Unit., does the mark-to-market process. Daily market quotes are obtained transparently, and the unrealized profit or losses are computed. The results are presented to management daily.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

Other market risk measures

Other market risk measures specific to individual business units include permissible instruments, concentration of exposures, gap limits, issuer limits, maximum tenor and stop loss triggers. In addition, only approved products that can be independently priced and properly processed are permitted to be traded.

Pricing models and risk metrics used in production systems, whether these systems are off-the-shelf or in-house developed, are independently validated by the Risk Management unit before their use and periodically thereafter to confirm the continued applicability of the models. In addition, the Risk Management unit assesses the daily liquid closing price inputs (used to value instruments) and performs a review of less liquid prices from a reasonableness perspective at least monthly.

Where differences are significant, mark-to-market adjustments are made.

Annual net interest income at risk

A dynamic forward-looking annual net interest income forecast is used to quantify the Bank's anticipated interest rate exposure. This approach involves the forecasting of both changing balance sheet structures and interest rate scenario, to determine the effect these changes may have on future earnings. The analysis is completed under both normal market conditions as well as stressed market conditions.

Stress tests

Stress testing provides an indication of the potential losses that could occur in extreme market conditions and is carried out to augment other risk measures that are used by the Group, such as market risk factor sensitivities.

These stress scenarios are typically used to highlight exposures that may not be explicitly incorporated by specific sensitivity calculations (such as basis, price and correlation) that can be the source of large losses when abnormally large market movements occur. Stress testing also attempts to indicate the size of the loss provoked by any of a number of unlikely but possible shock events given current positions held. The stress tests carried out include individual market risk factor testing and combinations of market factors on individual asset classes and across different asset classes. Stress tests include a combination of historical and hypothetical simulations.

4.2.3 Foreign Exchange Risk

The Group takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows, primarily with respect to the US dollar. The bank is exposed to foreign exchange risk primarily through its assets, managing customers' deposits and through acting as an intermediary in foreign exchange transactions.

The Group has a robust risk management system that identifies, measures and mitigates the foreign currency exchange rate risk on its financial position and cash flows. Apart from regulatory imposed limits such as the net open position limit (OPL) which is set at 0.5% of Shareholders' funds that helps to limit these exposures, the bank has market risk limits such as:

• Daily mark-to-market mechanism that revalue all currency positions daily, ensuring that foreign currency positions are valued at current market price and not at cost.

• An Open Position Limit that is more stringent than the regulatory limit.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

• A Bank wide limit on the maximum volume of foreign currency denominated securities to invest in.
• Aggregate position limits for individual currency positions, which limits exchange rate risk in all currencies that the bank has exposures.
The Group mitigates the changes in fair value attributable to foreign-exchange rate movements in certain transactions. Typically, entering into a forward foreign-exchange contract is used as a preferred hedging mechanism. In addition, the Group enters into currency swaps to hedge against foreign exchange risk in the year 2014, the CBN issued a policy stating that the Net Open Position (long or short) of the overall foreign currency assets and liabilities taking into cognizance both those on and off-balance sheet should not exceed 10% of shareholders' funds unimpaired by losses using the Gross Aggregate Method.

The Group does a daily monitoring of its foreign currency balance sheet to ensure that Open positions do not exceed regulatory prescribed limit. The table below shows a breakdown of financial assets and financial liabilities by currency.

4.2.4 Interest rate risk

The Group is exposed to cash flow interest rate risk, which is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market interest rate risk. One of the Group’s primary business functions is providing financial products that meet the needs of its customers. Loans and deposits are tailored to the customers’ requirements with regard to tenor, and rate type. Net Interest Income (NII) is the difference between the yield earned on portfolio assets (including customer loans) and the rate paid on the liabilities (including customer deposits or wholesale borrowings). NII is affected by changes in the level of interest rates.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

Movements in interest rate on the Group's core activities affect its reported earnings and book capital by affecting the Net Interest Income (NII). The value of the Group's assets, liabilities, and interest-rate-related, off-balance-sheet items is affected by a change in rates because the present value of future cash flows, and in some cases the cash flows themselves, is changed.

The Group's primary strategy for managing interest rate risk is to match interest rate sensitivities of both sides of its Balance sheet. In this respect, the Group separately identifies and classifies its assets and liabilities based on their sensitivities i.e. floating vs. fixed rates. All floating rate components of the Balance sheet are managed against a defined benchmark rate. All fixed rate components are managed against a re-pricing profile benchmark to be determined by the ALM desk and approved by the ALCO.

The table below summarises the Group's interest rate gap position:

Group 31 December 2024	Carrying amount	Variable interest	Fixed interest	Non interest-bearing
	N'000	N'000	N'000	N'000

In monitoring and measuring its Interest Rate Risk exposure, the Group monitors set gap limits and measures the potential impact on net interest revenue over a specified period, for the accrual positions, from a defined parallel shift in the yield curve. It is a forward-looking measure, analogous to factor sensitivity on the trading portfolios. We measure the potential change of interest rate margin of the Group for 100 basis points parallel change of interest rate curve in the horizon.

In order to manage these risks effectively, the Group may modify pricing on new customer loans and deposits, enter into transactions with other institutions or enter into forward exchange contracts that have the opposite risk exposures. Therefore, the Group regularly assesses the viability of strategies to reduce unacceptable risks to earnings and implements such strategies when the bank believes those actions are prudent.

The Group employs additional measurements, including stress testing on the impact of non-linear interest rate movements on the value of the balance sheet, the analysis of portfolio duration, volatility and the potential impact of the change in the spread between different market indices.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

The table below indicates the earliest time the Group can vary the terms of the underlying financial asset or liabilities. The bank's interest rate risk exposure on assets and liabilities are categorised by the re–pricing dates.

Interest Rate GAP	**(35,117,611)**	**56,721,990**	**(36,235,403)**	**4,532,327**

The management of interest rate risk against interest rate gap limits is supplemented by monitoring the sensitivity of the Group 's financial assets and liabilities to specific interest rate scenarios. The sensitivity analysis is the effect of the assumed changes in interest rates on the profit or loss for the period, based on the floating rate non-trading financial assets & liabilities and trading financial assets held as at 31 December 2024. The sensitivity analysis on the non-trading portfolio measures the change in value of the non-trading accrual portfolio due to a 100-basis point parallel move in the interest rates.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

The table below shows the impact on the Group's equity and profit or loss if interest rates on financial instruments held at amortised cost and at fair value through other comprehensive income had increased by 100 basis points, with all other variables held constant.

	31 December 2024	31 December 2023
	N'000	N'000
Effect of 100 basis points increase on profit before tax (N'000)	146,841	(347,317)
Effect of 100 basis points decrease on profit before tax (N'000)	(146,841)	347,317

4.2.5 Price Risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices, whether those changes are caused by factors specific to the individual financial instrument or its issuer or by factors affecting all similar financial instruments traded in the market. The Group assess the potential impact that fluctuations of identified market risk factors would have on the bank income and the value of its holdings of financial instruments.

The Group employs additional measurements, including stress testing on the impact of non-linear interest rate movements on the value of the balance sheet, the analysis of portfolio duration, volatility and the potential impact of the change in the spread between different market indices.

The Group is exposed to price risk from holdings in its FVTPL portfolio and investment in FMDQ OTC exchange and investment in the Nigeria Inter-bank Settlement Scheme (NIBSS). These investments were made based on regulatory directives rather than with a view to profit on a subsequent sale. The securities are all unquoted. Given the nature of the investments, the bank estimates that the exposure to price risk is low.

Stress testing is performed on trading portfolios on a regular basis to estimate the impact of extreme market movements. The level of price risk exposure at any given point in time depends on the market environment and expectations of future price and market movements, which will vary from period to period.

The below tables show the sensitivity analysis of price risk of investment securities per portfolio and security type at various basis points.

INSTRUMENT TYPE - BONDS	PORTFOLIO	MTM LOSS/GAIN (millions)	100bp (millions)	300bp (millions)	500bp (millions)
Federal Government Bonds	FVOCI	(1,785)	(2,245)	(3,091)	(3,848)

		(22)	**(61)**	**(86)**	**(110)**

4.2.6 Liquidity Risk

Liquidity risk is one of the key risks we contend with at the Bank. This is the risk that securities or assets held by the Bank cannot be traded quickly enough to meet obligations as they become due. It occurs when the cushion provided by liquid assets is not sufficient to meet outstanding obligations. Liquidity risk does not occur in isolation; it is often triggered by consequences of other financial risks like credit risk and market risks such as interest rate risk, foreign exchange risk and security price risk. For Merchant Banks, the regulatory liquidity requirement is 30% while the regulatory minimum for Commercial Banks is also 30%. As at 31 December 2024, the bank's liquidity ratio stood at 98% (December 2023: 98.6%). The CBN in its drive to boost lending to the real sector mandated all banks to maintain a minimum Loan to Deposit Ratio of 50%. As at 31 December 2024, the bank's LDR ratio stood at 60.02% (December 2023: 68.5%).

4.2.6.1 Managing Liquidity Risk

The board of directors sets the strategy for managing liquidity risk and delegates responsibility for oversight of the implementation of this policy to the Assets & Liability Committee (ALCO). ALCO approves the Group's liquidity policies and procedures. The ALM Desk manages the Group's liquidity position on a day-to-day basis and reviews daily reports covering the liquidity position of both the Bank and Group. A summary report, including any exceptions and remedial action taken, is submitted regularly to ALCO.

The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. The key elements of the Group's liquidity strategy are as follows.

• Maintaining a diversified funding base consisting of customer deposits and wholesale market deposits and maintaining contingency facilities.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

• Carrying a portfolio of liquid assets, diversified by currency and maturity.
• Monitoring liquidity ratios, maturity mismatches, behavioural characteristics of the Group's financial assets and financial liabilities, and the extent to which the Group's assets are encumbered and so not available as potential collateral for obtaining funding.
• Carrying out stress testing of the Group's liquidity position.

Liquidity limits establish boundaries for market access in business-as-usual conditions and are monitored against the liquidity position on a daily basis. The survival horizon of the Group has been set to 14 days. To ensure this is the case, the Group intends to hold enough liquid assets to cover for any negative GAP over the next 14 days.

Regular liquidity stress testing is conducted under a variety of scenarios covering both normal and more severe market conditions. The scenarios are developed taking into account both Bank specific events (e.g. a rating downgrade) and market-related events (e.g. prolonged market illiquidity, reduced flexibility of currencies, natural disasters or other catastrophes). The Bank has in place contingency funding lines with Nigerian financial institutions. The bank engages the services of rating agencies to perform a credit rating assessment on the bank. A rating downgrade could have a negative impact on the bank's funding and liquidity due to reduced funding capacity and increased funding cost.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

4.2.6.2 Funding approach

Our sources of liquidity are regularly reviewed by ALCO and ALM Desk in order to avoid undue reliance on large individual investors and ensure that a satisfactory overall funding mix is maintained at all times. The funding strategy is geared towards ensuring effective diversification in sources and tenor of funding.

The tables below analyse the Group's financial assets and liabilities into relevant maturity banking based on their contractual maturities for:

a) all non-derivative financial assets and liabilities, and

b) net and gross settled derivative financial instruments for which the contractual maturities are essential for an understanding of the timing of the cash flows.

The amounts disclosed in the table are the contractual undiscounted cash flows.

4.3 Fair Value

Financial instruments measured at fair value

IFRS 13 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable input reflects market data obtained from independent sources; unobservable inputs reflect the Group's market assumptions. These two types of inputs have created the following fair value hierarchy:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices) This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the observable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect the difference between the instruments. The Group uses the following procedures to determine the fair value of financial assets and liabilities:

Trading / Investment securities

Where available, the Group uses the quoted market prices to determine the fair value of trading assets and such items are classified as Level 1 of the fair value hierarchy. Quoted market prices are gotten from the website of the

Financial Market Dealers Quotations (FMDQ).

Investment securities classified as Other Comprehensive Income are measured at fair value by reference to quoted market prices when available and therefore are classified as Level 1Where there are securities that are not actively traded, the Group uses internal valuation techniques which are based on observable inputs obtained from the quoted market prices of similar actively traded securities. In this instance, these are classified as level 2.

Derivatives Instruments

The fair value of financial instruments including forward foreign exchange contracts traded in active markets is based on quoted market prices at the closing date. Known calculation techniques, such as estimated discounted cash flows, are used to determine fair value of interest rate and currency financial instruments. The Group bases the calculation on existing market conditions at each closing date. Financial instruments used in FSDH are standardised products that are either cleared via exchanges or widely traded in the market. Forward foreign exchange contracts are entered into with creditworthy financial institutions and with corporates.

Unquoted equity

If quoted market prices are not available, the fair values are estimated based on internal valuation techniques or the last traded price on an OTC exchange. The key inputs depend upon the type of equity and the nature of inputs to the valuation technique. The item is placed in either Level 2 or Level 3 depending on the type of investment and valuation technique used.

The Group recognises transfers between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred. There was no transfer within fair value hierarchies during the year.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

4.5 Capital Management

The Group's objectives in managing Capital are:

- To comply with the regulatory requirements of the Central Bank of Nigeria
- To ensure that the Group continues as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders by ensuring that capital deployed meets our RAAC (Risk Asset Acceptance Criteria)

Capital adequacy and the use of regulatory capital are monitored daily by the Group's management, employing techniques based on the guidelines developed by the Central Bank of Nigeria (CBN), for supervisory purposes.

In line with the CBN circular BSD/DIR/GR/GEN/LAB/06/053 regarding Regulatory Capital Measurement for the Nigerian Banking System for the implementation of Basel II/III in Nigeria, Capital adequacy is measured daily and reported monthly to the Central Bank of Nigeria in line with Basel II set principles, which measures Credit, Market and Operational Risks.

The ratios below summarise the composition of regulatory capital and the ratios of the Bank for the year ended 31 December 2024. Over this review period, the Bank complied with all the externally imposed capital requirements to which it was and is subject.

TOTAL RISK-WEIGHTED CAPITAL RATIO	11.42%	11.00%
TIER 1 RISK-BASED CAPITAL RATIO	9.94%	10.48%

As a Merchant Bank, the Central Bank of Nigeria's regulatory requirements are as follows

a. Hold the minimum level of the regulatory capital of N15 billion and
b. Maintain a ratio of total regulatory capital to the risk-weighted asset at or above the minimum of 10%.
c. Maintain a liquidity ratio minimum of 30%.

As at 31 December 2024, the Bank had eligible risk capital of N27.7billion, which was in excess of the regulatory minimum. In addition, liquidity ratio stood at 98%, loan to deposit ratio was 60.02% and our capital adequacy ratio stood at 11.42%. The risk weighted assets are measured using the Central Bank of Nigeria's interpretation and ranking of the risk assets.

Currently, the Bank's capital and regulatory ratios are in excess of the CBN regulatory minimum.

4.6 Critical accounting estimates and judgements

The Group's financial statements and its financial result are influenced by accounting policies, assumptions, estimates and management judgement, which necessarily have to be made in the course of preparation of the consolidated financial statements. The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. All estimates and assumptions required in conformity with IFRS Accounting Standards are best estimates undertaken in accordance with the applicable standard.

Estimates and judgements are evaluated on a continuous basis, and are based on experience and other factors, including expectations with regard to future events. Accounting policies and management's judgements for certain items are especially critical for the Group's results and financial situation due to their materiality.

(a) Impairment losses on financial assets

The Group reviews its loan portfolio to assess impairment on a quarterly basis. Expected credit losses are the unbiased probability weighted average credit losses determined by evaluating a range of possible outcomes and future economic conditions.

The Group has set policies to guide staging criteria in determining significant increase in credit risk. The Group has also developed the capability to model a number of economic scenarios and capture the impact on credit losses to ensure the overall ECL represents a reasonable distribution of economic outcomes. Appropriate governance and oversight has been established around the process.

The methodology and assumptions used for estimating probability of default, loss given default, discount factor, exposure at default, forward looking macro-economic factors and timing of future cash flows are reviewed regularly as the Bank builds historical data in computation of its expected credit loss.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

(b) Fair value of financial instruments

The determination of fair value for financial assets and liabilities for which there is no observable market prices requires the use of valuation techniques. For financial instruments that trade infrequently and have little price transparency, fair value is less objective and requires varying degrees of judgement depending on liquidity concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument. Fair valuation techniques and assumptions

Bonds

The fair values for illiquid bonds are gotten from an independent source. The source's bond prices are model prices derived from a modelled yield. The modelled yield is calculated by adding a risk premium to the valuation yield (corresponding Tenor to Maturity (TTM) yield interpolated off the FGN bond theoretical spot rate curve). This is used to calculate the bond bid price.
Risk premiums are derived by 2 methods described below.

- Apply risk spread on latest acceptable trade for the respective bonds i.e., determine the spread between the bond yield on the latest acceptable trade and the FGN bond spot rate of comparable TTM.

- Apply risk spread at issuance i.e., determine the spread between the bond yield at issuance and the FGN bond spot rate of comparable TTM. However, where the risk spread at issuance is less than 1% (100 basis points), a base risk premium of 100 basis points is applied.

The fair value of quoted equity securities is determined by reference to quoted prices (unadjusted) from the Nigerian Stock Exchange. However, fair value of unquoted equity investments has been derived from the last OTC (over the counter)
transaction.

Derivatives

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently re-measured to their fair value at each balance sheet date. A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. Derivatives are presented as financial assets or financial liabilities. Derivative assets and liabilities are only offset if the transactions are with the same counterparty, a legal right of offset exists and the parties intend to settle on a net basis. The fair value of financial instruments is based on quoted market prices at the closing date. Known calculation techniques, such as estimated discounted cash flows, are used to determine fair value of interest rate and currency financial instruments. The fair value of forward foreign exchange contracts is determined using forward exchange market rates at the closing date.

(c) Deferred tax assets and liabilities.

The deferred tax assets and liabilities recognized by the Group is dependent on the availability of taxable profit in the foreseeable future to utilize the deferred tax. The Group reviews the carrying amount of the deferred tax at the end of each reporting period and recognizes an amount such that it is probable that sufficient taxable profit will be available which the Group can use the benefit there from in determining the deferred tax assets recognized in the financial statements, the Group has applied judgement in estimating the deferred tax recoverable in the foreseeable future. This involves the estimation of future income and expenses, and the consideration of non-taxable income and disallowable expenses to arrive at the future taxable profit / loss.

(d) Leases

Lease term - In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated). The assessment is reviewed if a significant event or a significant change in circumstances occurs which affects this assessment and that is within the control of the lessee.

Interest rate - In determining the interest rate used in discounting the lease payments, the interest rate implicit in the lease is used. If that rate cannot be determined, the lessee’s incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

FSDH MERCHANT BANK LIMITED
NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

(ii) Included in Professional fees is the sum of N19.6m (2023: N8.1m) paid to KPMG Professionals for non-audit services provided during the year.

The breakdown of the non-audit services for the year are as follows:	31 December 2024 N'000	31 December 2023 N'000	31 December 2024 N'000	31 December 2023 N'000
NDIC Deposit Liability certification	1,800	1,613	1,800	1,613
ISA 810 Engagement - Report on summary of Financial Statements (Commercial Paper Issuance Programme)	4,000	-	4,000	-
Corporate governance and risk management review	12,000	5,375	12,000	5,375
Remuneration Survey	1,800	1,075	1,800	1,075
	19,600	8,063	19,600	8,063

The Bank paid the auditors professional fees for non-audit services. These services, in the Bank's opinion, did not impair the independence and objectivity of the external auditor.

(iii) Included in other operating expenses are tax advisory costs, ITF expenses, postages, levies, stationery and other sundry expenses.

(iv) Included in Donations for prior period is the write back of the sum of N250m accrued for the police equipment fund accrued to cushion the effect of property destroyed during END SARS

13 Income tax expense

	Group		Bank	
	31 December 2024	31 December 2023	31 December 2024	31 December 2023
Tax charge for the year comprises:	N'000	N'000	N'000	N'000
a) Income Tax Charge				
Income tax	366,851	167,991	344,257	167,991
Windfall tax (see note c below)	210,413	-	210,413	-
Education tax	466,611	71,820	464,351	71,820
NITDA Expense	146,127	53,032	146,127	53,032
Police Trust Fund	734	265	731	265
NASENI Levy	36,532	13,258	36,532	13,258
Total current tax charge	1,227,268	306,366	1,202,411	306,366
b) Deferred tax				
Recognised in income statement:				
Reversal of deferred tax credit	288,820	312,889	288,820	312,889
Total deferred tax charge	288,820	312,889	288,820	312,889
Income tax expense	1,516,088	619,255	1,491,231	619,255

c) Windfall tax

During the year, the Federal Government of Nigeria enacted a new tax legislation to implement a windfall profit levy of 70% on realized profits from all foreign exchange transactions of banks in Nigeria licensed to carry out foreign exchange transactions under the Banks and Other Financial Institutions Act, 2020 and all other relevant Nigerian laws. The windfall profit levy applies to the 2023, 2024 and 2025 financial years. This change resulted in the recognition of the charge for the year ended 31 December 2023 as a change in estimate.

	Group		Bank	
(i) Reconciliation of effective tax	31 December 2024 N'000	31 December 2023 N'000	31 December 2024 N'000	31 December 2023 N'000

Included in Balances with banks outside Nigeria is an amount of N35.3billion (31 Dec 2023: N6.9billion) representing the Naira value of foreign currencies held on behalf of customers to cover letters of credit transactions. The corresponding liability is reported as customers' deposit for foreign trade under other liabilities (see Note 30).
Mandatory reserve deposits with the Central Bank of Nigeria represents a percentage of customers' deposits (prescribed from time to time by the Central Bank) which is not available for daily use.
For purpose of statement of cashflows, these mandatory reserve deposits are excluded from cash and cash equivalents.

i. The N15.66m investment in equity securities represents N15m investment in FMDQ Group Plc exchange and N0.67m investment in the Nigeria Inter-bank Settlement Scheme (NIBSS). Total dividend of N0.149m was received as dividend from NIBSS during the year (2023: N0.12m). The Bank chose this alternative presentation because these investments were made based on regulatory directives rather than with a view to profit on a subsequent sale, and there are no plans to dispose of these investments in the short or medium term.

ii. The Bank has made an irrevocable election to classify all its unquoted equity investment at FVOCI.

Lease represents the company's lease of building in the following locations: Lagos, Abuja and Port-Harcourt.

25 Deferred tax asset

Group and Bank
Deferred income tax is calculated on all temporary differences under the liability method using a statutory tax rate of 30% (2023: 30%).

Movements in temporary differences during the year:

	1 January 2024 N'000	Recognised in P&L N'000	31 December 2024 N'000
Accelerated tax depreciation	(94,386)	-	(94,386)
Tax loss carry forward	2,019,192	(288,820)	1,730,372
	1,924,806	(288,820)	1,635,986

	1 January 2023 N'000	Recognised in P&L N'000	31 December 2023 N'000
Accelerated tax depreciation	(94,386)	-	(94,386)
Tax loss carry forward	2,332,081	(312,889)	2,019,192
	2,237,695	(312,889)	1,924,806

Deferred tax assets have not been recognised in respect of unutilized tax losses of N13.42bn (Dec 2023: N35.84bn), with tax effect of N3.31bn (Dec 2023: N11.47bn) because it is not probable that future taxable profit will be available against which the Bank can use the benefits therefrom. Unutilized tax losses are carried forward indefinitely under the Nigerian tax laws.

36 Share premium and other reserves

The nature and purpose of the reserves in equity are as follows:

(a) Share premium: Premiums from the issue of shares are reported in share premium.

Reconciliation of share premium	Ordinary share premium	
	2023	**2024**
	N'000	**N'000**
Balance as at 1st January	234,381	234,381
Unissued shares of the Bank be issued through a Bonus Issue to the existing shareholders	-	-
Balance as at 31 December	234,381	234,381

(**b) Retained earnings:** The details of movement in Retained Earning is included in the Statement of Changes in Equity which is on Page 26 and Page 27 of this Annual Report

(c) Statutory reserve: In accordance with the Banks and Other Financial Institutions Act of 2020 (Amended), 15% of profit after taxation has been transferred to statutory reserve.

(d) Fair value reserve: The fair reserve shows the effects from the fair value measurement of financial instruments of the FVOCI category. Any gains or losses on this class of financial instruments are not recognised in the consolidated income statement until the financial asset has been sold or impaired. The net change in fair value on FVOCI financial assets recorded in other comprehensive income has no tax effect because the financial instruments that gave rise to the changes are tax exempt.

Changes in fair value reserve	Fair Value Reserve	
	2023	**2024**
	N'000	**N'000**
Balance as at 1st January	(4,451,528)	(1,523,516)
Fair value change in FVOCI financial assets	3,047,026	(754,620)
Impairment on FVOCI financial assets	(119,014)	(121,016)
Net Changes in Fair Value on FVOCI financial assets	2,928,012	(875,636)
Balance as at 31 December	(1,523,516)	(2,399,152)

(d) AGSMEIS reserve: In 2017, the Central Bank of Nigeria (CBN) issued guidelines to govern the operations of the Agricultural, Small and Medium Enterprises Scheme (AGSMEIS), which was established to support the Federal Government's efforts at achieving sustainable economic development and employment generation.

An appropriation totalling N656m (2023:N234.19m) was done from retained earnings into the AGSMEIS reserve in the current year.

Changes in AGSMEIS reserve	AGSMEIS Reserve	
	2023	**2024**
	N'000	**N'000**
Balance as at 1st January	1,114,137	1,348,335
Appropriation from retained earnings - 5% of Profit after tax	234,198	656,072
Balance as at 31 December	1,348,335	2,004,407

37 Credit risk reserve

The credit (regulatory) risk reserve represents the difference between the impairment on loans and advances determined using the prudential guidelines issued by the Central Bank of Nigeria compared with the expected loss model used in determining the impairment loss under IFRS Accounting Standards.

Where the loan loss impairment determined using the prudential guidelines is greater than the loan loss impairment determined using the expected loss model under IFRS Accounting Standards, the difference is transferred to regulatory credit risk reserve and it is non-distributable to owners of the parent. When the prudential provisions is less than IFRS provisions, the excess charges resulting is transferred from the regulatory reserve to retained earnings to the extent of the non-distributable reserve previously recognised.

FSDH MERCHANT BANK LIMITED
NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

42 Contingent liabilities and commitments

(a) Legal proceedings

The Group had no litigation claims which arose in the normal course of business but has outstanding claims which are being contested. The directors having sought professional legal counsel are of the opinion that no loss will eventuate, hence no provision has been made for them in these financial statements. There are a total of 3 proceedings against the Bank amounting to N347.63 million (Dec 2023: three amounting to N347.63 million).

(b) Credit related commitments

In the normal course of business, the bank is party to financial instruments with off-balance sheet risk. The instruments are used to meet credit and other financial requirements of customers. The contractual amounts of the off-balance sheet financial instruments are:

	Group		Bank	
	31 December 2024 N'000	31 December 2023 N'000	31 December 2024 N'000	31 December 2023 N'000
Letters of Credit	21,205,789	21,432,819	21,205,789	21,432,819
Performance bonds and guarantees	15,236,217	12,621,751	15,236,217	12,621,751
Loan Commitments	23,330,694	29,881,867	23,330,694	29,881,867
	59,772,700	63,936,437	59,772,700	63,936,437

The total outstanding contractual amount of the undrawn credit lines which represents loan commitments does not necessarily represent future cash outflows, as these lines may expire or terminate without being drawn. Likewise, there are varying conditions to be met before such commitments can be drawn upon.

43 Related party transactions

The Group is controlled by FSDH Holding Company Limited, incorporated in Nigeria, which owns **99.99%** of the ordinary shares.

FSDH Holding Company Limited is the immediate parent company of FSDH Merchant Bank Limited as well as the ultimate controlling party .

44 Shared Services Arrangements

FSDH Merchant Bank maintains shared services arrangements to enhance operational efficiency and optimize resource utilization. These arrangements encompass the following services:

- Internal Audit
- Human Resource
- Information Technology Services
- Brand Marketing and Communications
- Administration
- Internal Control Risk Management
- Compliance

The implementation of these shared services arrangements provides strategic value through:

- Enhanced operational efficiency through streamlined service delivery
- Standardization of processes and optimal resource allocation
- Reduced administrative overhead costs
- Improved service delivery speed and accuracy

These arrangements are structured in accordance with relevant regulatory guidelines and are subject to regular review to ensure continued effectiveness and compliance with regulatory requirements. The costs incurred by FSDH Merchant Bank in respect of the functions are shared by the bank and other related entities in agreed ratio that reflect the rate of consumption by each entity. The costs shared are actual cost incurred with no mark-up included.

45 Insider related credits

In line with the Central Bank of Nigeria circular BSD/1/2004, banks in Nigeria are required to disclose insider related credits. As at 31 December 2024, there were no insider-related credits in the books of the bank (December 2023: Nil).

Insider-related credits include transactions involving shareholders, employees, directors and their related interests; the term director being as defined in section 19(6) of BOFIA 2020 (as amended). Under the circular, credits to employees under their employment scheme of service and shareholders' whose shareholding and related interest are less than 5% of the bank's paid up capital, are excluded.

FSDH MERCHANT BANK LIMITED
NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

46 Earnings per share

(i) Basic

Basic earnings per share is calculated by dividing the net profit after tax attributable to the equity holders of the Bank by the weighted average number of ordinary shares in issue during the year.

	Group		Bank	
	31 December 2024 N'000	31 December 2023 N'000	31 December 2024 N'000	31 December 2023 N'000
Profit after tax attributable to equity holders of the parent bank (N'000)	13,145,184	4,683,951	13,121,440	4,657,236
Weighted average number of ordinary shares ('000)	2,138,623	2,138,623	2,138,623	2,138,623
Weighted average number of ordinary shares excluding treasury shares ('000)	2,138,623	2,138,623	2,138,623	2,138,623
Basic earnings per share (in kobo per share)	615	219	614	218

(ii) Diluted

The Bank does not have potential ordinary shares with convertible options and therefore there is no dilutive impact on the profit attributable to the equity holders (31 December 2023: Nil).

47 Dividends

	Group		Bank	
	31 December 2024 N'000	31 December 2023 N'000	31 December 2024 N'000	31 December 2023 N'000
Proposed final dividend of N1.44k (2023: N0.67)	3,072,499	1,435,377	3,072,499	1,435,377
Interim dividend of N2.82k (2023: N0.64)	6,040,000	1,370,000	6,040,000	1,370,000
	9,112,499	2,805,377	9,112,499	2,805,377

During the year, the directors proposed an interim dividend of N7.12billion but N6.04billion (N2.82k per share) was approved for payment by CBN. A final dividend of N3.84billion representing N1.80k per share was proposed at year end but CBN approved the sum of N3.07billion representing N1.44k per share. This will be presented for ratification by the shareholders at the next Annual General Meeting.

These financial statements do not reflect this resolution which will be accounted as an appropriation of retained earnings.

48 Compliance with banking regulations

During the year, the bank paid the sum of N22m Penalty relating to infraction from the CBN Risk Based Supervisory review which covered July 2022 to June 2023.(Dec 2023: N6m. Of the N6m paid as fine, N2m relates to infraction on post-periodic employment background check on the Bank's I.T department, while N4m arose from spot check of AML/CFT/CPF compliance on PEPs).

49 Events after statement of financial position date

There was no significant event after the reporting date that can materially affect the true and fair position of the financial statements as at 31st December 2024
